**and the Papacy in the Modern World** Frank J. Coppa, 2008-06-30 The outbreak of the French Revolution and the Industrial Revolution at the turn of the nineteenth century transformed the world and ushered in the modern age whose currents challenged the traditional political order and the prevailing religious establishment The new secular framework presented a potential threat to the papal leadership of the Catholic community which was profoundly affected by the rush towards modernization In the nineteenth century the transnational church confronted a world order dominated by the national state until the emergence of globalization towards the close of the twentieth century Here Coppa focuses on Rome s response to the modern world exploring the papacy s political and diplomatic role during the past two centuries He examines the Vatican s impact upon major ideological developments over the years including capitalism nationalism socialism communism modernism racism and anti-Semitism At the same time he traces the continuity and change in the papacy s attitude towards church state relations and the relationship between religion and science Unlike many earlier studies of the papacy which examine this unique institution as a self contained unit and concentrate upon its role within the church this study examines this key religious institution within the broader framework of national and international political diplomatic social and economic events Among other things it explores such questions as the limits to be placed on national sovereignty the Vatican s critique of capitalism and communism the morality of warfare and the need for an equitable international order *The Vatican and the Emergence of the Modern Middle East* Agnes de Dreuzy, 2016-04-15 8 The Holy See and Palestine

**The Limits of Empire: European Imperial Formations in Early Modern World History** William Reger,2016-03-03 This volume published in honor of historian Geoffrey Parker explores the working of European empires in a global perspective focusing on one of the most important themes of Parker s work the limits of empire which is to say the centrifugal forces sacral dynastic military diplomatic geographical informational that plagued imperial formations in the early modern period 1500 1800 During this time of wrenching technological demographic climatic and economic change empires had to struggle with new religious movements incipient nationalisms new sea routes new military technologies and an evolving state system with complex new rules of diplomacy Engaging with a host of current debates the chapters in this book break away from conventional historical conceptions of empire as an essentially western phenomenon with clear demarcation lines between the colonizer and the colonized These are replaced here by much more fluid and subtle conceptions that highlight complex interplays between coalitions of rulers and ruled In so doing the volume builds upon recent work that increasingly suggests that empires simply could not exist without the consent of their imperial subjects or at least significant groups of them This was as true for the British Raj as it was for imperial China or Russia Whilst the thirteen chapters in this book focus on a number of geographic regions and adopt different approaches each shares a focus on and interest in the working of empires and the ways that imperial formations dealt with or failed to deal with the challenges that beset them Taken together they reflect a new phase in the evolving historiography of empire They also reflect the scholarly contributions of the dedicatee Geoffrey Parker whose life and work are discussed in the introductory chapters and we re proud to say in a delightful chapter by Parker himself an autobiographical reflection that closes the book

Mangion,Susan O'Brien,2023-09-01 After 1830 Catholicism in Britain and Ireland was practised and

experienced within an increasingly secure Church that was able to build a national presence and public identity. With the passage of the Catholic Relief Act (Catholic Emancipation) in 1829 came civil rights for the United Kingdom's Catholics which in turn gave Catholic organisations the opportunity to carve out a place in civil society within Britain and its empire. This Catholic revival saw both a strengthening of central authority structures in Rome creating a more unified transnational spiritual empire with the person of the Pope as its centre and a reinvigoration at the local and popular level through intensified sacramental, devotional and communal practices. After the 1840s Catholics in Britain and Ireland not only had much in common as a consequence of the Church's global drive for renewal but the development of a shared Catholic culture across the two islands was deepened by the large scale migration from Ireland to many parts of Britain following the Great Famine of 1845. Yet at the same time as this push towards a degree of unity and uniformity occurred there were forces which powerfully differentiated Catholicism on either side of the Irish Sea. Four very different religious configurations of religious majorities and minorities had evolved since the sixteenth century Reformation in England, Ireland, Scotland and Wales. Each had its own dynamic of faith and national identity and Catholicism had played a vital role in all of them either as other or in the case of Ireland as the majority's self. Identities of religion, nation and empire and the intersection between them lie at the heart of this volume. They are unpacked in detail in thematic chapters which explore the shared Catholic identity that was built between 1830 and 1913 and the ways in which that identity was differentiated by social class, gender and above all nation. Taken together these chapters show how Catholicism was integral to the history of the United Kingdom in this period.

[A History of Italy](#) Claudia Baldoli, 2009-11-19. Until the beginning of the 18th century to be Italian meant to identify with a number of collective memories rather than a national memory. Yet there are elements of continuity that have shaped Italian identity over the past 1,500 years. Religion, food, art and architecture, a literary language as well as a particular relationship between cities and countryside, between family and civil society have all contributed to present day Italian culture and politics. Baldoli explores the history of Italy as a country rather than as a nation in order to trace its fascinating cultural and political development. Offering a way into each period of Italian history the book brings Italy's past to life with extracts from poetry, novels and music. Drawing on the latest research published in English and Italian this is the ideal introduction for all those interested in Italy's cultural and social past and its significance for the country's present.
