Fort St. Joseph Revealed Michael S. Nassaney, 2021-10-04 Fort St Joseph Revealed is the first synthesis of archaeological and documentary data on one of the most important French colonial outposts in the western Great Lakes region Located in what is now Michigan Fort St Joseph

was home to a flourishing fur trade society from the 1680s to 1781. Material evidence of the site lost for centuries was discovered in 1998 by volume editor Michael Nassaney and his colleagues who summarize their extensive excavations at the fort and surrounding areas in these essays. Contributors analyze material remains including animal bones, lead seals, smudge pits, and various other detritus from daily life to reconstruct the foodways, architectural traditions, crafts, trade, and hide processing methods of the fur trade. They discuss the complex relationship between the French traders and local Native populations who relied on each other for survival and forged links across their communities through intermarriage and exchange even as they maintained their own cultural identities. Faunal remains excavated at the site indicate the French quickly adopted Native cuisine as they were unable to transport perishable goods across long distances. Copper kettles and other imported objects from Europe were transformed by Native Americans into decorative ornaments such as tinkling cones, and French textiles served as a medium of stylistic expression in the multi-ethnic community that developed at Fort St Joseph. Featuring a thought-provoking look at the award-winning public archaeology program at the site, this volume will inspire researchers with the potential of community-based service learning initiatives to tap into the analytical power at the interface of history and archaeology. The Archaeology of the Royal Flying Corps Melanie Winterton, 2022-10-07
Winterton's book is a good introductory effort on the haptic environment of World War I aviators and their personal artifacts. The Journal of the Air Force Historical Foundation Archaeology provides a fascinating insight into the lives of the aviators of the First World War. Their descriptions of the sensation of flying in the open cockpits of the primitive warplanes of the day and the artifacts that have survived from these first years of aerial combat give us a powerful sense of what their wartime service was like and chart the beginning of our modern understanding of aviation. But the subject hasn't been explored in any depth before, which is why Melanie Winterton's pioneering book is so timely. Hers is the first study of the trench art, souvenirs, and lucky mascots associated with the Royal Flying Corps, which in an original way tell us so much about the experience of flying on the Western Front a century ago. Extensive quotations from the memoirs of these early airmen are combined with an analysis of the artifacts themselves. They convey something of the fear and anxiety the airmen had to grapple with on a daily basis and bring out the full significance of the poignant souvenirs they left behind. Pieces of crashed aeroplane, wooden propellers, strips of linen, fragments of metal, were recycled and circulated during the war and afterwards became the focus of attention in the domestic home. As Melanie Winterton demonstrates, these items connected the living with the deceased, which is why they are so strongly evocative even today.

The Plurality of Power Sarah Cowie, 2011-02-15 How do people

experience power within capitalist societies Research presented here explicitly addresses the notion of pluralistic power which encompasses both productive and oppressive forms of power and acknowledges that nuanced and multifaceted power relations can exist in combination with binary dynamics such as domination and resistance This volume addresses growing interests in linking past and present power relationships engendered by capitalism and in conducting historical archaeology as anthropology The Plurality of Power Industrial Capitalism and the Nineteenth Century Company Town of Fayette Michigan explores the subtle distribution of power within American industrial capitalism through a case study of a company town Issues surrounding power and agency are explored in regard to three heuristic categories of power In the first category the company imposed a system of structural class based power that is most visible in hierarchical differences in pay and housing as well as consumer behavior A second category addresses disciplinary activities surrounding health and the human body as observed in the built environment medical artifacts disposal patterns of industrial waste incidence of intestinal parasites and unequal access to healthcare The third ensemble of power relations is heterarcical and entwined with non economic capital social symbolic and cultural Individuals and groups drew upon different forms of capital to bolster social status and express identity both within and apart from the corporate hierarchy The goal in combining these diverse ideas is to explore the plurality of power relationships in past industrial contexts and to assert their relevance in the anthropology of capitalism
