Dissecting Characteristics via Machine Learning for Stock Selection David Dümig, 2020-01-31 Academic Paper from the year 2019 in the subject Business economics Investment and Finance language English abstract We conduct a comparative analysis of methods in the machine learning repertoire including penalized linear models generalized linear models boosted regression trees random forests and neural networks that investors can deploy to forecast the cross section of stock returns Gaining more widespread use in economics machine learning algorithms have demonstrated the ability to reveal complex nonlinear patterns that are difficult or largely impossible to detect with conventional statistical methods and are often more robust to the effects of multi collinearity among predictors We provide new evidence that machine learning techniques can improve the economic value of cross sectional return forecasts The implications of machine learning for quantitative finance are becoming both increasingly apparent and controversial There is a growing discussion over whether machine learning tools can and should be applied to predict stock returns with greater precision Broadly speaking models that can be used to explain the returns of individual stocks draw on stock and firm characteristics such as the market price of financial instruments and companies accounting data These characteristics can also be used to predict expected returns out of sample

Advocacy Networks and the Responsibility to Protect Sarka Kolmasova, 2023-02-03 This book contributes to existing debates on the Responsibility to Protect R2P by demonstrating new advocacy strategies and the greater interconnectedness of various R2P proponents In 2021 the UN General Assembly adopted a new resolution on R2P which reaffirmed its commitment from the 2005 World Summit Outcome and put R2P on the annual agenda For many R2P proponents this was another manifestation of worldwide R2P relevance and of growing support among UN members to protect people from genocide war crimes ethnic cleansing and crimes against humanity Yet the existing crises in Myanmar Venezuela Belarus Syria and many others revealed the widening gap between the discourse and practice This book aims to find out what keeps the concept alive despite its indisputable pitfalls In contrast to existing studies that treat the R2P endorsement or contestation as intertwined processes of norm evolution it argues that the status of

R2P has been accomplished by the conscious politics of its advocates operating in complex global networks. As such, the book puts emphasis on the agency of R2P champions and examines who keeps the idea resonating and how they manage to preserve its worldwide relevance. Rather than proposing a new model of advocacy, the book aims to pinpoint the politics of R2P's circulation, the importance of individual R2P champions and their interconnectedness through innovative forms of cooperation within complex networks. This book will be of much interest to students of the R2P, diplomacy, human rights, foreign policy and International Relations.

The Capacity to Innovate Sarah Giest, 2021-04-07. In *The Capacity to Innovate*, Sarah Giest provides insight into the collaborative and absorptive capacities needed to provide public support to local innovation through cluster organizations. The book offers a detailed view of the vertical, multi-level and horizontal dynamics in clusters and cluster policy and addresses how they are managed and supported. Using the biotechnology field as an example, Giest highlights challenges in the collaborative efforts of public bodies, private companies and research institutes to establish a successful ecosystem of innovation in this sector. The book argues that cluster policy in collaboration with cluster organizations should focus on absorptive and collaborative capacity elements missing in the cluster context in order to improve performance. Currently, governments operate at different levels from the local to the supranational in order to support clusters and cluster policies are often pursued alongside other programs, leading to uncoordinated efforts and ineffective cluster strategies. *The Capacity to Innovate* advocates for a coordinated effort by government and cluster organizations to support capacity elements lacking within the specific cluster context.

Innovation Communities Klaus Fichter, Severin Beucker, 2012-01-05. Self-organising networks have become the dominant innovators of complex technologies and radical innovation. The growing need for co-operation to ensure innovation success calls for a broader understanding of what makes innovation projects successful and requires new concepts. The book introduces the new concept of innovation communities, defining them as informal networks of like-minded individuals who act as innovation promoters or champions. These key figures come from various companies and organisations and will team up in a project-related fashion, jointly promoting a certain innovation product or idea, either on one or across different levels of an innovation system. The publication presents findings from surveys that demonstrate that networks of champions are a success factor in radical innovation. Five case studies of noteworthy innovation projects illustrate why the

collaboration of champions can make innovation projects more successful Furthermore the book presents hands on methods and includes best practice cases and guidelines on how to develop innovation communities This publication comprises empirical findings and practical experiences that are valuable for the following groups in particular Entrepreneurs Innovation R Innovation and strategy consultants Innovation and start up intermediaries Innovation researchers Government officials and politicians responsible for R D and innovation programmes and funding Coaching Champions Jess Gibson,1994 *Navigating Applied Sport and Exercise Psychology* Erin Prior,Tim Holder,2023-06-05 In recent years more students have chosen to study sport and exercise psychology with a view to building careers as applied practitioners While sport and exercise psychology master s graduates leave university with the necessary theoretical knowledge to inform their practice they are often left wanting to know more about creating and navigating a career within the field *Navigating Applied Sport and Exercise Psychology* provides readers with an honest and contemporary insight into the work and experiences of trainees and early career practitioners This book delves further into the more complex and nuanced experiences of being an applied practitioner Using case studies and reflections the chapters explore key topics including working within multi disciplinary teams maintaining ethics and integral practice during challenging conversations and supporting mental health in high performance environments Written by trainees and early career practitioners this book is vital reading for students early career practitioners and anyone interested in sport psychology Erin Prior is a BPS Chartered HCPC registered Sport and Exercise Psychologist As an applied practitioner Erin works with a range of individuals teams and organisations across various sports Alongside her applied practice Erin is completing her PhD which is focused on athlete mental health at Loughborough University Tim Holder PhD is an HCPC Registered Sport and Exercise Psychologist BPS Chartered and a BASES Fellow He is an applied sport psychology consultant and supervisor to students working towards practitioner status in the UK Tim is the Programme Leader for the MSc in Applied Sport Psychology at the University of Winchester UK
