The New Allergy Diet Dr John Hunter, Elizabeth Workman, Jenny Woolner, 2012-04-24 Many people are unaware that they suffer from food allergies or intolerance Inexplicable rashes a persistent runny nose bloatedness headaches or pronounced weight gain for no apparent reason are just some of the symptoms that may indicate a sensitivity to certain types of food Now fully revised and updated The New Allergy Diet is a practical dietary programme devised by one of the country s leading allergy specialists It has been highly successful in combating a wide range of health problems including Irritable Bowel Syndrome Migraine Asthma and rhinitis Eczema Urticaria Each food type is systematically excluded from the diet for a period of time and then gradually reintroduced with guidelines for monitoring the body s responses Easy tried and tested recipes are included which have been carefully designed with taste in mind but excluding common trigger foods such as wheat dairy products yeast and coffee

The New Evolution Diet Arthur De Vany, 2011-12-20 Believe it or not our DNA is almost exactly the same as that of our ancestors While scientific advances in agriculture medicine and technology have protected man to some degree from dangers such as starvation illness and exposure the fact remains that our cave dwelling cousins were considerably healthier than we are Our paleolithic ancestors did not suffer from heart disease diabetes high blood pressure or obesity In fact a good deal of what we view as normal aging is a modern condition that is more akin to disease than any natural state of growing older Our predecessors were incomparably better nourished than we are and were incredibly physically fit And certainly none of them ever craved a doughnut let alone tasted one In fact the human preference for sweet tastes and fatty textures was developed in an environment where such treats were rare and signaled dense useful energy This once helpful adaptation is the downfall of many a dieter today It s what makes it hard to resist fats and sweets especially when they are all around us We are not living as we were built to live Our genes were forged in an environment where activity was mandatory you were active or you starved or were eaten This created strong selective pressure for genes encoding a smart physically adept individual capable

of very high activity levels Humans are among the most active of species and we carry energetically expensive brains to boot Our energy expenditures rank high among all animals At least they once did The New Evolution Diet by Arthur De Vany PhD is a roadmap back to the better health our ancestors once enjoyed By eliminating modern foods including carbohydrates dairy and all processed foods from our diets we can undo much of the damage caused by our modern food environment The plan is based on three simple principles 1 Enjoy the pleasure of food and do not count or restrict calories Eat three satisfying meals a day filled with non starchy vegetables fruits and high quality lean proteins 2 Do not starve yourself but do go hungry episodically for brief periods to promote a low fasting blood insulin level and increase metabolic fat burning 3 Exercise less not more but with more playfulness and intensity The goal is to create a strong body with a high resting metabolism and a large physiologic capacity to move through life easily not to burn calories
