prominently in these modern treatments are introduced at appropriate places The main theme of Volume I is the analysis of linear fragmentation models with Volume II devoted to processes that involve the nonlinear contribution of coagulation Features of Volume II A primer on weak compactness in L^1 and dynamical systems A comprehensive theory of solvability of the coagulation fragmentation equation by both the semigroup and weak compactness methods including a thorough analysis of the gelation and shattering phenomena A detailed analysis of the long term dynamics of the coagulation fragmentation equations with a state of the art discussion on self similar solutions

Witnesses to Permanent Revolution: The Documentary Record Richard B. Day, Daniel Gaido, 2009-02-23 The theory of Permanent Revolution has been associated with Leon Trotsky for more than a century since the first Russian Revolution in 1905 Trotsky was the most brilliant proponent of Permanent Revolution but by no means its sole author The documents in this volume most of them translated into English for the first time demonstrate that Trotsky was one of several participants in a debate from 1903-7 that involved numerous leading figures of Russian and European Marxism including Karl Kautsky Rosa Luxemburg Franz Mehring Parvus and David Ryazanov This volume reassembles that debate assesses it with reference to Marx and Engels and

provides new evidence for interpreting the formative years of Russian revolutionary Marxism **Secularism and the Pursuit of Transcendence, Volume II** Stanley E. Porter, Wendy J.
