DISABLING THE DEAF  
COMMUNITY

"In *When the Mind Hears*, Harlan Lane gave us a memorable history of the deaf. Its readers know the vivid, almost novelistic power which Lane brings to his writing—it is this, and a deep passion, and a frightening truth, which infuse every page of *The Mask of Benevolence*." • OLIVER SACKS •

**The Sage Encyclopedia of LGBTQ+ Studies, 2nd Edition** Abbie E. Goldberg, 2023-01-05 The SAGE Encyclopedia of LGBTQ Studies 2nd Edition will be a broad interdisciplinary product aimed at students and educators interested in an interdisciplinary perspective on LGBTQ issues This far reaching and contemporary set of volumes

is meant to examine and provide understandings of the lives and experiences of LGBTQ individuals with attention to the contexts and forces that shape their world. The volume will address questions such as: What are the key theories used to understand variations in sexual orientation and gender identity? How do LGBTQ people experience the transition to parenthood? How does sexual orientation intersect with other key social locations e.g. race to shape experience and identity? What does LGBTQ affirmative therapy look like? How have anti LGBTQ ballot measures affected LGBTQ people? What are LGBTQ people's experiences during COVID 19? How were LGBTQ people impacted by the Trump administration? What is life like for LGBTQ people living outside the United States? This encyclopedia will be a unique product on the market: a reference work that looks at LGBTQ issues and identity primarily through the lenses of psychology, human development and sociology and emphasizing queer feminist and ecological perspectives on this topic. Entries will be written by top researchers and clinicians across multiple fields: psychology, human development, gender/queer studies, sexuality studies, social work, nursing, cultural studies, education, family studies, medicine, public health and sociology, contributing to approximately 450-500 signed entries. All entries will include cross references and Further Readings.

**The Auditory Culture Reader** Michael Bull, Les Back, 2020-05-31. The first edition of *The Auditory Culture Reader* offered an introduction to both classical and recent work on auditory culture, laying the foundations for new academic research in sound studies. Today, interest and research on sound thrives across disciplines such as music, anthropology, geography, sociology and cultural studies, as well as within the new interdisciplinary sphere of sound studies itself. This second edition reflects on the changes to the field since the first edition and offers a vast amount of new content, a user-friendly organization which highlights key themes and concepts, and a methodologies section which addresses practical questions for students setting out on auditory explorations. All essays are accessible to non-experts and encompass scholarship from leading figures in the field, discussing issues relating to sound and listening from the broadest set of interdisciplinary perspectives. Inspiring students and researchers attentive to sound in their work, newly commissioned and classical excerpts bring urban research and ethnography alive with sensory case studies that open up a world beyond the visual. This book is core reading for all courses that cover the role of sound in culture within sound studies, anthropology, sociology, cultural studies, history, media studies and urban geography.

**Deaf Rhetoric** Manako Yabe, 2022-03-08. This book guides healthcare professionals, hospital administrators and medical interpreters in the United States and internationally in ways to better communicate with Deaf and Hard of Hearing (D/HH) patients and sign language interpreters in healthcare settings. It also provides an overview of the healthcare communication issues with healthcare professionals and D/HH patients and the advantages and disadvantages of using in-person interpreters vs. video remote interpreting (VRI). Due to technology development, hospital administrators have popularized the use of VRI and reduced the number of in-person interpreting services, which have negatively affected the quality of medical interpreting services and patient-provider communication. The COVID 19 pandemic also has accelerated the move toward more VRI, particularly in the

US The book addresses an understudied aspect of access and is written by an international deaf researcher from Japan who uses American Sign Language ASL and English as non native languages In order to identify appropriate interpreting services for specific treatments the author focuses on healthcare professionals and D HH patients interpreting preferences for critical and non critical care in the US and offers a new theoretical framework an Ecology of Health Communication to contextualize and analyze these preferences The ecological matrix and its five analytical dimensions i e physical material psychological social spatial and temporal allow readers to understand how these dimensions influence healthcare professionals and D HH patients interpreting preferences as well as the treatment outcomes This book concludes by prioritizing the use of an appropriate interpreter for specific treatments and allocating funds for in person interpreters for critical care treatments Deaf Rhetoric An Ecology of Health Communication is primarily designed for healthcare professional students and professionals hospital administrators medical interpreters VRI companies and healthcare researchers Scholars interested in the communication preferences of healthcare professionals and deaf people also will find this text useful The book counters some of the power differences between healthcare providers and those who use medical services and subtly reminds others that deaf people are not solely the receivers of medical care but actually are full people The field of health care is growing and medical schools are increasingly called on to address cultural competencies this resource provides a needed intervention
