Urban Ecology Richard T. T. Forman, 2014-02-13 The first richly illustrated worldwide portrayal of urban ecology tying together organisms built structures and the physical environment around cities **Principles of Soundscape Ecology** Bryan C. Pijanowski, 2024-06-06 From a founding figure in the field the definitive introduction to an exciting new science What do the sounds of a chorus of tropical birds and frogs a clap of thunder and a cacophony of urban traffic have in common They are all components of a soundscape acoustic environments that have been identified by scientists as a combination of the biophony geophony and anthrophony respectively of all of Earth s sound sources As sound is a ubiquitous occurrence in nature it is actively sensed by most animals and is an important way for them to understand how their environment is changing For humans environmental sound is a major factor in creating a psychological sense of place and many forms of sonic expression by people embed knowledge and culture In this book soundscape ecology pioneer Bryan C Pijanowski presents the definitive text for both students and practitioners who are seeking to engage with this thrilling new field Principles of Soundscape Ecology clearly outlines soundscape ecology s critical foundations key concepts methods and applications Fundamentals include concise and valuable descriptions of the physics of sound as well as a thorough elucidation of all sounds that occur on Earth Pijanowski also presents a rich overview of the ecological sociocultural and technical theories that support this new science illustrating the breadth of this amazingly transdisciplinary field In methods he describes the principles of data mining signal processing and mixed methods approaches used to study soundscapes in ecological social or socio ecological contexts The final section focuses on terrestrial aquatic urban and music applications demonstrating soundscape ecology s utility in nearly all spaces **Reimagining Sustainable Cities** Stephen M. Wheeler, Christina D. Rosan, 2021-12-07 Introduction How do we get to carbon neutrality How do we adapt to the climate crisis How might we create more sustainable economies How can we make affordable inclusive and equitable cities How do

we reduce spatial inequality How could we get where we need to go more sustainably How do we manage land sustainably How can we design greener cities How do we reduce our ecological footprints How can cities better support human development How might we have more functional democracy How can each of us help lead the move toward sustainable communities Conclusion

The Sacred Waters 'of' Varanasi Mahesh Gogate, 2023-06-16 This book on urban water bodies catchment areas and drainage pattern is set against the backdrop of the unprecedented heavy rainfall that severely deluged metropolitan cities and other parts of India in recent years The recurring natural catastrophes in water stressed cities of India and alarming rate of diminishing water bodies wetlands and catchment areas needs a re visit to an entire urban water cycle This book thus discusses how the processes and implementation of colonial urban development policies and projects have radically transformed the water bodies and their catchment areas traditional water holding systems of Varanasi city In this imperative colonial process through the case study of Varanasi the book mainly engages with the reasons behind the elimination of the temple tanks and ponds after the annexation of Varanasi by the British from 1775 till 1947 The book investigates the colonial notion of dry city and how this notion crafted the process of separating land and water bodies which arguably resulted in the reclamation and draining of water bodies and also gave rise to water pollution Additionally the book analyzes the elimination of water bodies and loss of catchment areas through the ongoing processes of restoring the ancient city's natural and cultural heritage Print edition not for sale in South Asia India Sri Lanka Nepal Bangladesh Pakistan and Bhutan

Ancient Mesoamerican Population History Adrian S.Z. Chase, Arlen F. Chase, Diane Z. Chase, 2024-05-07 Establishing ancient population numbers and determining how they were distributed across a landscape over time constitute two of the most pressing problems in archaeology Accurate population data is crucial for modeling interpreting and understanding the past Now advances in both archaeology and technology have changed the

way that such approximations can be achieved Including research from both highland central Mexico and the tropical lowlands of the Maya and Olmec areas this book reexamines the demography in ancient Mesoamerica Contributors present methods for determining population estimates field methods for settlement pattern studies to obtain demographic data and new technologies such as LiDAR light detecting and ranging that have expanded views of the ground in forested areas Contributions to this book provide a view of ancient landscape use and modification that was not possible in the twentieth century This important new work provides new understandings of Mesoamerican urbanism development and changes over time Contributors Traci Ardren M Charlotte Arnauld B rbara Arroyo Luke Auld Thomas Marcello A Canuto Adrian S Z Chase Arlen F Chase Diane Z Chase Elyse D Z Chase Javier Estrada Gary M Feinman L J Gorenflo Julien Hiquet Scott R Hutson Gerardo Jim nez Delgado Eva Lemonnier Rodrigo Liendo Stuardo Jos Lobo Javier L pez Mej a Michael L Loughlin Deborah L Nichols Christopher A Pool Ian G Robertson Jeremy A Sabloff Travis W Stanton

Transitioning to Sustainable Cities and Communities Hubert Klumpner, Klearjos Eduardo Papanicolaou, Georgeen Theodore, 2024-11-14 In developing alternative approaches to urban development in response to the societal challenge of living in ever expanding cities this Volume on the SDG11 Sustainable Cities and Communities proposes the concept of an Urbanising Earth We question the dominant model of Western cities and their resultant global warming leading to the replacement of natural environments with artificial ones The Volume features over twenty practical and metaphorical cases from experienced practitioners to emerging design thinkers each of whom offer interconnected reflections on the research design and implementation of projects anchored in architecture and design arguments promoting a more balanced view of the built and natural environment These reflections designed to engage readers highlight the collective effort needed for sustainable urban development The Volume aims to facilitate design as a learning process for society to reconcile human and environmental rights while celebrating the art of cultivating and living in this urban age The right to education and housing can create synergies providing parks and public spaces to underprivileged neighbourhoods The overall aim is to connect thinking with actions while considering what modernism in architecture and urban planning is today In doing this the Volume sheds light on the condition of contemporary design itself We draw from limitless approaches to the fundamental challenges and critical discussions presented to us by this Urbanising Earth

Towns, Ecology, and the Land Richard T. T. Forman,2019-02-07 A pioneering book highlighting the dynamic environmental dimensions of towns and villages and spatial connections with surrounding land **Compact Cinematics** Pepita Hesselberth,Maria Poulaki,2017-01-26 Compact Cinematics challenges the dominant understanding of cinema to focus on the various compact short miniature pocket sized forms of cinematics that have existed from even before its standardization in theatrical form and in recent years have multiplied and proliferated taking up an increasingly important part of our everyday multimedia environment Short films or micro narratives cinematic pieces or units re assembled into image archives and looping themes challenge the concepts that have traditionally been used to understand cinematic experience like linear causality sequentiality and closure and call attention to complex and modular forms of cinematic expression and perception Such forms in turn seem to meet the requirements of digital convergence which has pushed the

development of more compact and mobile hardware for the display and use of audiovisual content on laptops smartphones and tablets Meanwhile contemporary economies of digital content acquisition filing and sharing equally require the shrinking of cinematic content for it to be recorded played projected distributed and installed with ease and speed In this process cinematic experience is shortened and condensed as well so as to fit the late capitalist attention economy The essays in this volume ask what this changed technical socio economic and political situation entails for the aesthetics and experience of contemporary cinematics and call attention to different concepts theories and tools at our disposal to analyze these changes

Complexity Economics Koenraad Verboven, 2020-11-25 Economic archaeology and ancient economic history have boomed the past decades The former thanks to greatly enhanced techniques to identify collect and interpret material remains as proxies for economic interactions and performance the latter by embracing the frameworks of new institutional economics Both disciplines however still have great difficulty talking with each other There is no reliable method to convert ancient proxy data into the economic indicators used in economic history In turn the shared cultural belief systems underlying institutions and the symbolic ways in which these are reproduced remain invisible in the material record This book explores ways to bring both disciplines closer together by building a theoretical and methodological framework to evaluate and integrate archaeological proxy data in economic history research Rather than the linear interpretations offered by neoclassical or neomalthusian models we argue that complexity economics based on system theory offers a promising way forward
