William M. Rohe, 2012-04-17 Over the past three decades the economy of North Carolina's Research Triangle defined by the cities of Raleigh Durham and Chapel Hill has been transformed from one dependent on agriculture and textiles to one driven by knowledge based jobs in technology telecommunications and pharmaceuticals Now home to roughly 1.7 million people the Research Triangle has attracted an influx of new residents from across the country and around the world while continuing to win praise for its high quality of life At the region's center is the 7,000 acre Research Triangle Park one of the nation's largest and most prominent research and development campuses Founded in 1959 through a partnership of local governments universities and business leaders Research Triangle Park has catalyzed the region's rapid growth and hastened its coalescence into a single metropolitan area The Research Triangle From Tobacco Road to Global Prominence describes the history current challenges and future prospects of this fascinating metropolitan area Focusing on the personalities and perspectives of key actors in the development of the region William M Rohe traces the emergence of the Research Triangle Park and its role in the region's economic transformation He also addresses some of the downsides of development illustrating the strains that explosive population growth has placed on the region's school systems natural resources transportation infrastructure and social cohesion As Rohe shows the Research Triangle is not a city in the traditional sense but a sprawling conurbation whose rapid low density growth and attendant problems are indicative of metropolitan life in much of America today Although the Triangle's short term prospects are bright Rohe warns that troubling issues loom the region is expected to add nearly a million residents over the next two decades and will need to be addressed through improvements in governmental cooperation regional planning and civic leadership Finally the author

outlines key lessons that other metropolitan areas can learn from the Research Triangle's dramatic rise to prominence

Black and Green Jamal Ali, 2012-07-10 *Black and Green* is a call to action for the Black community to join the green movement. The book offers insights, ideas, and strategies that demonstrate how Black people can benefit from this movement and also fuel the go green effort. Ali builds on the premise that the call to go green has not quite resonated in the Black community and discusses several reasons as to why. Ultimately, he offers tangible benefits that Black colleges, churches, and even cities should be eager to embrace. These include better health, neighborhood crime reduction, and new jobs. This book clearly broadens the go green discussion to include the Black community in a way that is both compelling and engaging.

Trinity Parkway, from IH-35E/SH-183 to US-175/SH-310, Dallas County, 2005 *The Great Acceleration* Robert Colvile, 2016-04-07 Flash crashes, speed dating, instant messaging. From the devices we carry to the lives we lead, everything is getting faster, faster. But where did this great acceleration come from? And where will it lead? In this vitally important new book, Robert Colvile explains how the cult of disruption in Silicon Valley, the ceaseless advance of technology, and our own fundamental appetite for novelty and convenience have combined to speed up every aspect of daily life. Drawing on the latest research, this book traces the path of this acceleration through our working and social lives, the food we buy, and the music to which we listen. It explains how it's transforming the media, politics, and the financial markets, and asks whether our bodies and the natural environment can cope. As we race towards the future into a world packed with new technologies, new ideas, and new discoveries, this scintillating and engrossing book is an invaluable must-read guide to the wonders and dangers that await us. *Global Energy Assessment* Thomas B. Johansson, Anand Prabhakar Patwardhan, Nebojša Nakićenović, Luis Gomez-Echeverri, 2012-08-27 Independent, scientifically based, integrated policy-relevant analysis of current and emerging energy issues for specialists and policymakers in academia, industry, government. **The Oxford Handbook of Urban**

Planning Randall Crane, Rachel Weber, 2015 Why plan? How and what do we plan? Who plans for whom? These three questions are then applied across three major topics in planning: States, Markets, and the Provision of Social Goods. The Methods and Substance of Planning and Agency Implementation and Decision Making. *City* P.D. Smith, 2012-01-01 An illustrated tribute to city dwelling, surveys thousands of years of history, and traces urban languages, customs, and economies while providing mini-essays on such topics as the Tower of Babel and SimCity. *Advances in Cartography and GIScience. Volume 2* Anne Ruas, 2011-05-02 This book is comprised of a selection of the best papers presented during the 25th International Cartography Conference, which was held in Paris between 3rd and 8th July 2011. The scope of the conference covers all fields of relevant GIS and Mapping research, subjects such as geovisualization, semiotics, SDI standards, data quality, data integration, generalization, use, and user issues, spatio-temporal modelling and analysis, open source technologies, and web services, digital representation of historical maps, history of GIS and cartography, as well as cartography for school children and education.

Urban Transport in the Developing World Harry T. Dimitriou, Ralph Gakenheimer, 2011-01-01 Policy making for urban

transport and planning of economies in the developing world present major challenges for countries facing rapid urbanisation and rampant motorisation alongside growing commitments to sustainability. These challenges include coping with financial deficits, providing for the poor, dealing meaningfully with global warming and energy shortages, addressing traffic congestion and related land use issues, adopting green technologies and adjusting equitably to the impacts of globalisation. This book presents a contemporary analysis of these challenges and new workable responses to the urban transport problems they spawn.

Ports and the Environment Meifeng Luo, Tsz Leung Yip, 2017-10-02. Ports are a vital part of the global economy connecting the world through maritime transport networks, promoting international trade and supporting global economic growth. However, port communities are increasingly concerned about the local environmental problems associated with air pollution from increased port activities. Efforts are increasingly being made into the reduction of human-induced changes to the global environment, and one of the target areas is to reduce air emissions from international shipping. It appears that management of the port sector has entered into a new era, not only because environmental concerns are increasingly being expressed surrounding the ports themselves but also because many of the new environmental measures associated with the shipping trade have to be enforced when ships are in port. *Ports and the Environment* assembles research focusing on the management of ports and the environmental issues associated with both the shipping trade and the ports themselves. By examining contemporary concerns from the perspectives of maritime policy, port management and industrial efficiency, this book will provide important reference for future research and policy making in this area. This book was originally published as a special issue of *Maritime Policy Management*.

The ^AOxford Handbook of New York State Government and Politics Gerald Benjamin, 2012-09-03. *The Oxford Handbook of New York State Government and Politics* brings together top scholars and former and current state officials to explain how and why the state is governed the way that it is. The book's thirty-one chapters assemble new scholarship in key areas of governance in New York, document the state's record in comparison to other U.S. states and identify directions for future research.

No Impact Man Colin Beavan, 2009-09-01. Bill McKibben meets Bill Bryson in this seriously engaging look at one man's decision to put his money where his mouth is and go off the grid for one year while still living in New York City to see if it's possible to make no net impact on the environment. In *No Impact Man*, a guilty liberal finally snaps, swears off plastic, goes organic, becomes a bicycle nut, turns off his power and generally becomes a tree-hugging lunatic who tries to save the polar bears and the rest of the planet from environmental catastrophe while dragging his baby daughter and Prada-wearing Four Seasons-loving wife along for the ride. And that's just the beginning. In other words, no trash, no toxins in the water, no elevators, no subway, no products in packaging, no air conditioning, no television. What would it be like to try to live a no-impact lifestyle? Is it possible? Could it catch on? Is living this way more satisfying or less satisfying? Harder or easier? Is it worthwhile or senseless? Are we all doomed or can our culture reduce the barriers to sustainable living so it becomes as easy as falling off a log? These

are the questions at the heart of this whole mad endeavor via which Colin Beavan hopes to explain to the rest of us how we can realistically live a more eco effective and by turns more content life in an age of inconvenient truths **Gridlock** Randal O'Toole,2010-01-18 America is the most mobile society in history but our transportation system is on the verge of collapse Traffic congestion is today five times greater than it was 25 years ago yet many transportation plans and projects are making it worse As Randal O Toole reveals in Gridlock the prime causes of our ailing system are a government transportation planning philosophy whose primary goal is to diminish auto use hence personal mobility in combination with federal budget incentives that perversely encourage transportation planners to increase congestion As a result the automobile which is accessible to almost every family in the nation and provides unparalleled access to better housing low cost consumer goods a choice driven affordable life and freedom is being deliberately forced off the transportation grid by the expensive solution of little used high speed trains and urban transit lines Gridlock presents a wide range of innovative ideas and policy recommendations for creating an effective transportation system improvements that will increase our mobility and pay for themselves whether it s cars buses planes or trains At the center of O Toole s solutions are three core principles those who use transportation facilities should pay for them negative effects should be dealt with in a cost efficient manner and new technologies that will increase mobility at a low cost must be embraced In Gridlock Randal O Toole brings energetic and unconventional thinking to transportation strategies that have until now only driven us into the breakdown lane

Guidebook for Understanding Urban Goods Movement Suzann S. Rhodes,2012 Accompanied with a CD ROM that includes a report and appendices on the process that developed the guidebook and two PowerPoint presentations with speaker notes that transportation planners may use to help explain how local decision makers might enhance mobility and access for goods movement in their area *Safety Message Broadcast in Vehicular Networks* Yuanguo Bi,Haibo Zhou,Weihua Zhuang,Hai Zhao,2016-12-16 This book presents the current research on safety message dissemination in vehicular networks covering medium access control and relay selection for multi hop safety message broadcast Along with an overall overview of the architecture characteristics and applications of vehicular networks the authors discuss the challenging issues in the research on performance improvement for safety applications and provide a comprehensive review of the research literature A cross layer broadcast protocol is included to support efficient safety message broadcast by jointly considering geographical location physical layer channel condition and moving velocity of vehicles in the highway scenario To further support multi hop safety message broadcast in a complex road layout the authors propose an urban multi hop broadcast protocol that utilizes a novel forwarding node selection scheme Additionally a busy tone based medium access control scheme is designed to provide strict priority to safety applications in vehicle to infrastructure communications This book offers useful insights into protocol design and inspires a new line of thinking in performance improvements for safety applications in vehicular networks It is a valuable resource for professionals researchers or advanced level students working

in vehicular networks or quality of service **Terra Nova** Eric W. Sanderson, 2013-06-04 A look at what the American lifestyle has done to the environment and how to move toward a better future In the last century three powerful forces oil cars and suburbs buoyed the American dream Yet now the quality of life in the United States is declining due to these same three forces Our dependence on oil is a root cause of wars recessions and natural disasters Cars consume an outsize share of our incomes and force us to squander time in traffic Meanwhile expensive spread out suburbs devour farmland and in a vicious cycle further entrench our reliance on cars and oil In *Terra Nova* conservation ecologist Eric W Sanderson the national bestselling author of *Mannahatta* offers concrete steps toward a solution He delves into natural history architecture chemistry and politics to show how the American relationship to nature has shaped our past and how it can affect our future Illustrated throughout with maps charts and infographics *Terra Nova* demonstrates that it is indeed possible to achieve a better world Sanderson commendably outlines a new way of life designed to sustain American prosperity health and freedom for generations to come Publishers Weekly
