The Market Imperative Robert Zemsky, Susan Shaman, 2017-12-22 Thinking about American higher education as an economic market changes everything It is no surprise that college tuition and student debt are on the rise Universities no longer charge tuition to simply cover costs They are market enterprises that charge whatever the market will bear Institutional ambition along with increasing competition for students now shape the economics of higher education In *The Market Imperative* Robert Zemsky and Susan Shaman argue that too many institutional leaders and policy makers do not understand how deeply the consumer markets they promoted have changed American higher education Instead of functioning as a single integrated industry higher education is in fact a collection of segmented and more or less separate markets These markets have their own distinctive operating constraints and logics especially regarding price But those most responsible for federal higher education policy have made a muck of the enterprise while state policy making has all but disappeared the victim of weak imaginations insufficient funding and an aversion to targeted investment Chapter by chapter this compelling text draws on new data developed by the authors in a Gates Foundation funded project to describe the landscape how the market for higher education distributes students among competing institutions what the job market is looking for how markets differ across the fifty states and how the higher education market determines the kinds of faculty at different kinds of institutions The volume concludes with a three pronged set of policies for making American higher education mission centered as well as market smart Although there is no one size fits all approach for reforming higher education this clearly written book will productively advance understanding of the challenges colleges and universities face by providing a mapping of the configuration of the market for an undergraduate education

Higher Education Finance and Islamic Endowments Nurul Adilah Hasbullah,Asmak Ab Rahman,2023-11-07 Public debt pressures due to the global economic crisis have impacted higher education in several countries compelling governments to curtail the funding of higher education institutions HEIs Various instruments have been proposed as a platform for the private sector to channel funding to HEIs This book introduces readers to the issues surrounding the financing of HEIs especially public universities which are dependent on government budgets It discusses the sources of funding for HEIs focusing on philanthropic instruments through endowment and waqf funds Since both forms of income are obtained via contributions from third parties such as alumni individuals and business corporations it is essential that they are managed in such a way to ensure their sustainability and that their benefits can be accessed without interruption It explains the theory of successful endowment and waqf at HEIs namely appropriate investment planning superior investment committees highly skilled investment managers alumni networks diversity of income sources and effective fundraising These elements have been studied empirically in this book through case studies of several selected Malaysian public universities The book considers policy implications and offers recommendations of strategies that universities can adopt such as the appointment of fund managers No specific guidelines currently exist for appointing fund managers to enable universities to invest in assets such as bonds equities and property Therefore the book encourages universities to grow the endowment and waqf funds through proper investment strategies executed by professional fund managers The book contributes new knowledge to scholars students and researchers as well as informing university administrators how to collect manage and invest funds from endowment and waqf

Undermining Racial Justice Matthew Johnson,2020-04-15 Over the last sixty years administrators on college campuses nationwide have responded to black campus activists by making racial inclusion and inequality compatible This bold argument is at the center of Matthew Johnson s powerful and controversial book Focusing on the University of Michigan often a key talking point in national debates about racial justice thanks to the contentious Gratz v Bollinger 2003 Supreme Court case Johnson argues that UM leaders incorporated black student dissent selectively into the institution s policies practices and values This strategy was

used to prevent activism from disrupting the institutional priorities that campus leaders deemed more important than racial justice. Despite knowing that racial disparities would likely continue, Johnson demonstrates that these administrators improbably saw themselves as champions of racial equity. What Johnson contends in *Undermining Racial Justice* is not that good intentions resulted in unforeseen negative consequences but that the people who created and maintained racial inequities at premier institutions of higher education across the United States firmly believed they had good intentions in spite of all the evidence to the contrary. The case of the University of Michigan fits into a broader pattern at elite colleges and universities and is a cautionary tale for all in higher education. As Matthew Johnson illustrates, inclusion has always been a secondary priority and as a result the policies of the late 1970s and 1980s ushered in a new and enduring era of racial retrenchment on campuses nationwide.

Just Universities Gerald J. Beyer, 2021-02-23 Gerald J. Beyer's *Just Universities* discusses ways that U.S. Catholic institutions of higher education have embodied or failed to embody Catholic social teaching in their campus policies and practices. Beyer argues that the corporatization of the university has infected U.S. higher education with hyper-individualistic models and practices that hinder the ability of Catholic institutions to create an environment imbued with bedrock values and principles of Catholic Social Teaching such as respect for human rights, solidarity, and justice. Beyer problematizes corporatized higher education and shows how it has adversely affected efforts at Catholic schools to promote worker justice on campus, equitable admissions, financial aid retention policies, diversity and inclusion policies that treat people of color, women, and LGBTQ persons as full community members, just investment, and stewardship of resources and the environment.

Best Practices for Faculty Search Committees Jeffrey L. Buller, 2017-01-24 The essential guidebook for effective faculty hiring committees. *Best Practices for Faculty Search Committees* presents a clear, direct action plan for faculty and administration involved in hiring. Written by a veteran university administrator, this book lays out a step-by-step process for selecting the right candidate for the job. Practical guidance on application review, interviewing, and evaluation walks you through established and effective methods, while case studies and examples from a variety of institutions provide insight into real-world implementation. Whether you're serving on a faculty search committee for the first time or simply seeking a more efficient route to the best candidate, this book provides invaluable guidance that can streamline the search and selection process. Tenure-track and long-term opportunities don't come about every day, so it's essential for hiring committees to make the correct choice. While the search process may be codified to an extent by your institution, there is still plenty of room for error or misjudgment; this book helps you keep the process on track and moving forward until the best candidate is identified. Develop criteria for efficient and informative application review. Conduct in-depth interviews that provide a clear picture of fit. Evaluate final candidates on the most pertinent points for the job. Most faculty search resources are technical in nature with little guidance on getting the job done properly and efficiently; best practices tend to be unwritten and frequently verge into habit rather than critically evaluated.

method Best Practices for Faculty Search Committees provides clear concise concrete guidance for a more efficient effective and successful candidate search

Beyond Test Scores Jack Schneider,2017-08-14 When it comes to sizing up America s public schools test scores are the go to metric of state policy makers and anxious parents looking to place their children in the best schools Yet ample research indicates that standardized tests are a poor way to measure a school s performance It is time indeed past time to rethink this system Jack Schneider says *Beyond Test Scores* reframes current debates over school quality by offering new approaches to educational data that can push us past our unproductive fixation on test scores Using the highly diverse urban school district of Somerville Massachusetts as a case study Schneider and his research team developed a new framework to more fairly and comprehensively assess educational effectiveness And by adopting a wide range of measures aligned with that framework they were able to more accurately capture a broader array of school strengths and weaknesses Their new data not only provided parents educators and administrators with a clearer picture of school performance but also challenged misconceptions about what makes a good school With better data Schneider shows stakeholders at the federal state and local levels can undo the damage of present accountability systems and build greater capacity in our schools Policy makers administrators and school leaders can better identify where assistance is needed Educators can engage in more evidence based decision making And parents can make better informed choices for their children Perhaps most importantly better data can facilitate communication among all these groups allowing them to take collective action toward shared concrete goals
