

The Agency returned to the shield in the mid-1990s as the primary symbol of U.S. foreign assistance, but moved the stars and stripes to the lower third of the design and added USAID to the top. Color also was removed from the handclasp to ensure no specific race was identified.

In 2001, the Agency seal with, "United States Agency for International Development," in a circle around the shield was adapted as the official marking to ensure people understood the assistance provided was from the United States Government.

USAID
FROM THE AMERICAN PEOPLE

The logo was updated in 2004 to make it easier to read and reproduce. The typeface was changed to a sans serif, and the Agency name was repositioned around the shield to increase clarity; the handclasp was redrawn to be gender neutral and anatomically correct. These minor updates improved the overall communication, yet maintained the integrity and long heritage of this important U.S. symbol. A brand name and tagline also were added to ensure people understand the assistance is provided by U.S. taxpayers.

Note: Parts of this text were adapted from a 1987 story by James Bednar in the 25th Anniversary Issue of Horizons, a USAID publication.

US Agency for International Development Handbook Volume 1 Strategic, Practical Information and Business Opportunities IBP USA, *Communicating National Image through Development and Diplomacy* James Pamment, Karin Gwinn Wilkins, 2018-05-07 This edited collection draws upon interdisciplinary research to explore new dimensions in the politics of image and aid While development communication and public diplomacy are established research fields there is little scholarship that seeks to understand how the two areas relate to one another However international development doctrine in the US UK and elsewhere increasingly suggests that they are integrated or at the very least should be at the level of national strategy This timely volume considers a variety of cases in diverse regions drawing upon a combination of theoretical and conceptual lenses that combine a focus on both aid and image The result is a text that seeks to establish a new body of knowledge on how contemporary debates into public diplomacy soft power and the national image are fundamentally changing not just the communication of aid but its wider strategies modalities and practices Front Lines, 2005

Developing Capacity for Community Governance of Natural Resources Theory & Practice Brian Child & Deborah Wojcik, 2014-05 Community based natural resource management CBNRM is a compelling concept that combines community custodianship of natural resources with sustainable development and poverty reduction However there is a large gap between the conceptual promise and actual performance of CBNRM CBNRM is complex and challenging and one of the major challenges is what we call micro governance how to replace the ubiquitous problem of elite capture within communities with genuine participation and equitable benefit sharing This book is for people want to understand and implement CBNRM governance more effectively including graduate students scholars and practitioners It is targeted most specifically at the scholar practitioner who wants to draw upon micro governance theory to know why and how to work with communities to implement sound local institutions the perspectives and resources presented have been developed and tested over many years working with CBNRM

communities in southern Africa the book offers convincing evidence for preferring participatory democracy over representational forms of governance and discusses how to manage the scale paradox that economies and ecologies are better managed at larger scales but that larger representational institutions invariably forfeit critical public goods like participation and equitable benefit sharing the book s purpose is to provide the reader with the practical tools to operationalize good governance at the village level in ways that are theoretically sound It provides the reader with theoretical insights and practical lessons about micro governance in the context of CBNRM tools for designing and implementing conceptually rigorous community constitutions that enable communities to govern themselves fairly and effectively and resources for developing the management and monitoring systems necessary to protect these conditions

the Statistics Department toward assisting IMF member countries in developing the ability to provide reliable and comparable economic and financial data on a timely basis to policymakers and markets has increased more than fourfold over the past decade. This assistance has proven critical in countries building their statistical capacity so as to come into line with international data standards in an increasingly globalized and electronically interconnected world. Statistical Capacity Building: Case Studies and Lessons Learned presents four case studies drawn from experience in three countries in transition to the market, two of which were also in postconflict situations in the 1990s and early 2000s: Cambodia, Bosnia and Herzegovina, and Ukraine. Issues of setting institutional and statistical arrangements, strategies, and implementation are examined, and lessons learned.
