Sticky Prices and Monetary Policy Jean Boivin,Marc Paolo Giannoni,Ilian Mihov,2007 This paper disentangles fluctuations in disaggregated prices due to macroeconomic and sectoral conditions using a factor augmented vector autoregression estimated on a large data set On the basis of this estimation we establish eight facts 1 Macroeconomic shocks explain only about 15% of sectoral inflation fluctuations 2 The persistence of sectoral inflation is driven by macroeconomic factors 3 While disaggregated prices respond quickly to sector specific shocks their responses to aggregate shocks are small on impact and larger thereafter 4 Most prices respond with a significant delay to identified monetary policy shocks and show little evidence of a price puzzle contrary to existing studies based on traditional VARs 5 Categories in which consumer prices fall the most following a monetary policy shock tend to be those in which quantities consumed fall the least 6 The observed dispersion in the reaction of producer prices is relatively well explained by the degree of market power 7 Prices in sectors with volatile idiosyncratic shocks react rapidly to aggregate monetary policy shocks 8 The sector specific components of prices and quantities move in opposite directions

Intellectual Property

Law in China Christopher Heath, 2021-02-19 Intellectual property law and practice in China has changed dramatically since the first edition of this influential book published in 2005. Today judicial and administrative application of law plays a major role and accordingly this entirely rewritten new edition draws on an abundance of court and administrative decisions clarifying how the law is applied. In a thorough and systematic manner the authors clearly demonstrate the sophisticated level of legal certainty available for domestic and foreign entities doing business in China including the adaptation of the legal framework to new technologies, broadened scope of protected subject matter, improved quality of filings and significant enhancement of enforcement not only with regard to remedies but also to procedural aspects. Providing comprehensive coverage of all aspects of intellectual property protection in China including analysis of IP related provisions of China's new Civil Code, the book emphasizes issues of concern to foreign traders and investors such as the following: copyright law and software protection, protection of trademarks including Chinese character and Roman script trademarks, well known marks and bad faith applications, technology transfer, enforcement of trade secret and patent protection, criminal liability for infringement, unfair competition and antitrust law, role of the binding interpretations of the Supreme People's Court, administrative regulations that supplement the laws, co-operation with administrative authorities, protection of geographical indications, protection of trade names, domain name dispute resolution, special patent related laws protecting such areas as plant varieties, integrated circuit layout designs and relevant provisions of the distinct laws of Hong Kong and Macao. Full descriptions of the competencies of China's IP related institutions are included with detailed attention to procedural matters. Brief historical notes in each chapter feature the most significant changes in each amendment of law and regulation. Because in China the laws are supplemented and interpreted by numerous guidelines and circulars issued by ministries or courts, the up to date knowledge and awareness provided in this new edition is essential for all companies investing in China or considering such investment as well as for practitioners counselling their clients on strategies. In addition, officials and policymakers involved in trade or other relations with China will benefit from a comprehensive update of what the current law is and a critical view of what the challenges are. The 2021 IPLCN is a recommended read for those who seek a well written English textbook which covers the main principles of Chinese IP Law. Clearly outlined, it is probably one of the best of its kind on the market. Its existence is welcome and necessary in the current era where languages are still obstacles.
