Consuming mobility Jorrit O. Nijhuis, 2023-09-04 The current fossil fuel based system of mobility is associated with a wide range of environmental and social problems. There is a growing body of literature on system innovations and transitions which has as a common understanding that long term transformative change is necessary to deal with these complex problems. However, knowledge on the crucial role of citizen consumers in sustainable mobility transitions is still underdeveloped. By incorporating the viewpoint of consumption patterns and everyday life routines, this book provides new knowledge on the role of citizen consumers in sustainable mobility transitions. Theoretically, a practice based approach is developed as a novel framework to analyse, understand and influence transition processes to sustainable mobility at the level of everyday life. The focus in each of the three case studies is on situated interactions between consumers and producers. Amongst these is an analysis of the role of environmental information and subsidies in new car purchasing. Also, various examples in which an attempt was made to orchestrate a modal shift in commuting practices are examined. Each of the empirical case studies shows the important role of contextual factors in understanding and influencing mobility behaviour of citizen consumers. In addition, this book helps to understand how and why innovation in mobility practices takes place or not.

Consumer Action Guide, **Power Under Her Foot** Chris Lezotte, 2018-07-25 Since their introduction in 1964, American muscle cars have been closely associated with masculinity. In the 21st century, women have been a growing presence in the muscle car world, exhibiting classic cars at automotive events and rumbling to work in modern Mustangs, Camaros and Challengers. Informed by the experiences of 88 female auto enthusiasts, this book highlights women's admiration and passion for American muscle and reveals how restoring, showing and driving classic and modern cars provides a means to challenge longstanding perceptions of women drivers and advance ideas of identity and gender equality.

Application of Search Engine Marketing Methods in order to generate High-Quality Traffic Nina King, geb. Schweinsberg, 2006-11-22 **Inhaltsangabe** Abstract In a time of tightening budgets, rising bankruptcies and heightened job insecurity, all commerce, be it a major corporation or simply that of a sole operator, must improve its ROI (Return On Investment) rate in order to ensure its continued sustainability. This factor is the key performance indicator (KPI) for any business. The goal of improved ROI becomes all the more difficult when comparing the effectiveness of competing marketing strategies because intangible factors in the purchasing decision, such as brand awareness as well as product credibility and

loyalty cannot be easily quantified Even the consumer often has an unconscious preference for one particular product over another In this regard online marketing offers the advantage of the pull principle the user who pulls the information that he she is seeking for directly from the Internet initiates all activities This implies that a relationship is established between the corporation and consumer With 90 percent of all Internet users choosing to access a SE during a given session this first point of contact becomes often decisive in the success or failure for the online marketing concept Nevertheless there is an interdependency between both the attractiveness and the ability to locate a website i e its findability A website s content may be highly interesting and appropriate to the user s needs but it will be condemned to failure if it cannot be correctly sourced i e ranked by a SE Be that as it may every top ranked website will be rejected if content and usability disappoint expectations This report intends to show how Search Engine Optimization SEO can be used in a strategic context as the first part of the lead process SEO highlights the importance of keyword decisions in order to attract customers who secure high conversion rates and thus increase sales be it online or offline The first part of this analysis will explain the technical background of how SEs and keywords work Also there are several influential factors that should be considered when optimizing keywords for one s business such as SE algorithms the SE market the consumer and his position in the buying cycle as well as online competitors These aspects are discussed in the second part of this analysis The final part will present the concept of Online Performance Measurement Management OPMM and demonstrate how Search Engine Marketing SEM can affect a business
