MODEL V8300H-S AND V8000H-S SUNSHIELDS FOR V8300HC AND V8000HC HOUSINGS

NOTES	SHEET	REV.	SEC.
	X615	198	6

1. INTRODUCTION

The information in this manual covers the installation and maintenance of the V8300H-S and V8000H-S Sunshields for the V8300HC and V8000HC Environmental Housings, respectively.

The housings and sunshields are similar, except that the V8000HC and V8000H-S are larger than the V8300HC and V8300H-S. Both sunshields are made of ribbed aluminum in a heat-sink design to protect the housings from direct solar radiant heat while permitting air-flow over the housing exterior.

2. INSTALLATION

2.1 General

The sunshield kit contains left and right sunshield halves, two (2) housing cover support brackets, four (4) long sheet metal screws, four (4) short self-threading machine screws, and four (4) lockwashers. Additionally, the V8000H-S kit includes four (4) nylon spacers. The

V8300H-S uses No. 8 size hardware, while the V8000H-S uses No. 10 size hardware. The housing cover support brackets help support the housing cover when the sunshield is in place. Refer to Figure 1 when performing the installation procedure that follows.

2.2 Attaching the Sunshield

1. Remove the cover of the housing completely by releasing all four (4) clamps and lifting the cover off of the housing bottom.
2. Note the four (4) blind (closed) holes molded into the top surface of the housing cover. The four (4) long sheet-metal screws pass down through the two sunshield halves and thread into these holes.
3. Place one sunshield half on the housing cover, orienting it correctly front-to-rear. One end of each sunshield half is tapered to match the angle of the front of the housing. Attach it to the cover with two (2) of the long screws and lockwashers. When installing the V8000H-S, the nylon spacer supplied

must be inserted under the screw head. See Figure 1A. Repeat for the other sunshield half.

4. Carefully turn the assembly over. A molded-in square rib projects out from the lower edge of the cover on each side. The ribs are hollow and there is a metal dowel at each end. There are holes that pass through the hollow ribs near the dowels. The self-threading machine screws pass up through these holes into the sunshield. The cover support brackets are positioned in the underside of the rib. See Figure 1B.
