Tamanaha, 2012-06-15 On the surface law schools today are thriving Enrollments are on the rise and their resources are often the envy of every other university department Law professors are among the highest paid and play key roles as public intellectuals advisers and government officials Yet behind the flourishing facade law schools are failing abjectly Recent front page stories have detailed widespread dubious practices including false reporting of LSAT and GPA scores misleading placement reports and the fundamental failure to prepare graduates to enter the profession Addressing all these problems and more in a ringing critique is renowned legal scholar Brian Z Tamanaha Piece by piece Tamanaha lays out the how and why of the crisis and the likely consequences if the current trend continues The out of pocket cost of obtaining a law degree at many schools now approaches 200 000 The average law school graduate's debt is around 100 000 the highest it has ever been while the legal job market is the worst in decades with the scarce jobs offering starting salaries well below what is needed to handle such a debt load At the heart of the problem Tamanaha argues are the economic demands and competitive pressures on law schools driven by competition over U S News and World Report ranking When paired with a lack of regulatory oversight the work environment of professors the limited information available to prospective students and loan based tuition financing the result is a system that is fundamentally unsustainable Growing concern with the crisis in legal education has led to high profile coverage in the Wall Street Journal and the New York Times and many observers expect it soon will be the focus of congressional scrutiny Bringing to the table his years of experience from within the legal academy Tamanaha has provided the perfect resource for assessing what's wrong with law schools and figuring out how to fix them

Philip Alston, Sarah Knuckey, 2016 Fact finding is at the heart of human rights advocacy and is often at the center of international controversies about alleged government abuses In recent years human rights fact finding has greatly proliferated and become more sophisticated and complex while also being subjected to stronger scrutiny from governments Nevertheless despite the prominence of fact finding it remains strikingly under studied and under theorized Too little has been done to bring forth the assumptions methodologies and techniques of this rapidly developing field or to open human rights fact finding to critical and constructive scrutiny The Transformation of Human Rights Fact Finding offers a multidisciplinary approach to the study of fact finding with rigorous and critical analysis of the field of practice while providing a range of accounts of what actually happens It deepens the study and practice of human rights investigations and fosters fact finding as a discretely studied topic while mapping crucial transformations in the field The contributions to this book are the result of a major international conference organized by New York University Law School's Center for Human Rights and Global Justice Engaging the expertise and experience of the editors and contributing authors it offers a broad approach encompassing contemporary issues and analysis across the human rights spectrum in law international relations and critical theory This book addresses the major areas of human rights fact finding such as victim and witness issues fact finding for advocacy enforcement and litigation the role of interdisciplinary expertise and methodologies crowd sourcing social media and big data and international guidelines for fact finding **Graduate & Professional Programs: An**

rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality

Our Cherished Halls of Ivy Phillip L. Beukema, 2022-10-10 Higher education has both supporters and detractors although not in equal numbers Some would have us believe that our higher education enterprise is on the brink of disaster that it s falling apart at the seams Some go so far as to call the system broken beyond repair suggesting that it be rebuilt from the ground up Can it be this bad Drawing on his long experience in higher ed administration the author examines the sea change that s affected nearly every corner of the higher learning landscape These corners include the high and rising costs of tuition the crushing levels of student debt the shamefully low graduation rates in too many schools the growing million dollar clubs whose members include university presidents and football and basketball coaches the inadequacies of accreditation and the growing influence of partisan politics in the conduct of our public universities That s for starters With an insider s perspective the author paints a picture that is up front and honest laying bare the depth and extent of specific problems confronting that crucial engine of our economy higher education In each case he spells out what needs a tune up and what needs something closer to an overhaul Of course he offers specific proposals for fixing those problems They re likely to be controversial but the author hopes they spark a debate that ultimately leads to productive solutions
