Science, Technology and Innovation Culture Marianne Chouteau, Joëlle Forest, Céline Nguyen, 2018-10-08 We are facing unprecedented challenges

today For many of us innovation would be our last hope But how can it be done Is it enough to bet on the scientific culture How can technical culture contribute to innovation How is technical culture situated with regards to what we name collectively the culture of innovation It is these questions that this book intends to address **Hyperconnectivity** Dominique Carré, Geneviève Vidal, 2018-10-10 The use of digital information and communication technologies would be the traces of a social acceptability of the exploitation of all data in the context of negotiations of uses This is the reason why the users present themselves actors and contributors of the hyperconnectivity We would thus witness a new form of dissemination inviting user experience and social innovations It is thus the victory of subordination by negotiated renunciation A new form of serving no longer that of the 1980s with the counters and other services which have become uncontrolled services excepted when the users are overcome by restrictive ergonomics revealing too much the subordination device which joins the prescription apparently without an injunction The lure is at its height when users and broadcasters come together to produce the services and goods composing the business model until the very existence of the companies in particular the pure players Crowdsourcing becomes legitimate consumers create the content deliver the data the basis of the service sold in a painless way because free access most of the time indirect financing the providers make available and administer the service networks Interfaces representing considerable costs also reputation to attract the attention of other consumers or contributors In these conditions the environmental stakes are considerable so we propose another way of considering them not as they are dealt with material and pollution but according to the prism of the relational practices analyzed in this volume *Communications numériques en santé* Benoit Cordelier, Olivier Galibert, 2021-03-01 Controverses sur la gestion des crises sanitaires recherche d'informations sur les symptômes fausses informations sur les traitements émergents usage massif d'outils collaboratifs par les professionnels de santé d'ajout d'applications de traitement des maladies infectieuses La crise de la COVID 19 représente un exemple pertinent de la nécessité de la recherche en communication numérique permettant de comprendre le contexte info communicationnel en santé actuel Après un tour d'horizon des enjeux du numérique en santé cet ouvrage offre un regard critique sur les limites organisationnelles et professionnelles des usages des TIC pour les malades leurs aidants et les professionnels du soin Il analyse les liens entre TIC et éthique du soin car la communication en santé participe d'une prise en charge globale humaniste et mancipatrice pour les patients et les aidants Il présente les nouvelles formes numériques de la médiation des savoirs en santé qui voient travers Internet une mise en concurrence des savoirs experts biomédicaux et des savoirs profanes expérientiels *Science Fiction and Innovation Design* Thomas Michaud, 2020-10-22 Science fiction is often presented as a source of utopia or even of prophecies used in capitalism to promote social political and technoscientific innovations Science Fiction and Innovation Design assesses the validity of this approach by exploring the impact this imaginary world has on the creativity of engineers and researchers Companies seek to anticipate and predict the future through approaches such as design fiction mobilizing representations of science fiction to

create prototypes and develop scenarios relevant to organizational strategy The conquest of Mars or the weapons of the future are examples developed by authors to demonstrate how design innovation involves continuous dialogue between multiple players from the scientist to the manager through to the designers and the science fiction writers

Digital Technologies and African Societies Julien Atchoua, Jean-Jacques Maomra Bogui, Saikou Diallo, 2020-11-17 The integration and use of information and communication technologies ICT in African countries is increasingly observable in various sectors of activity banking education trade etc despite a digital divide still relevant ICT has become a major sector of the recent growth of a new informal economy in African cities Ch neu Loquay 2008 This question has been at the heart of various international meetings An overall positive and even utopian momentum is generally heard about the contribution of digital technologies to the development of African states The adoption or appropriation of digital technologies by Africans is presented in many speeches by politicians or institutions involved in the field of cooperation and international development as an important issue for the development of this continent These different considerations give rise to reflections on the following themes Social Media and Public Space in Africa Challenges of the digital economy in Africa ICT and modernization of higher education in Africa
