incompleteness unfinishedness are the challenges of the shadowlands Through the prism of this newly conceptualised analytical and epistemological tool the authors intend to grasp a fresh understanding of the processes of being becoming and being becoming in both their singular and multiple manifestations As an epistemological concept the shadowlands imply that anthropologists must not only identify these uncanny spaces of junction in their research but also shadowlands in the ethnographic papers that they produce In addition to a better understanding of the continuous fabrication of temporalities and being becoming the concept puts into perspective the discipline of anthropology itself Throughout the chapters the different authors permit to grasp the various applications of the shadowlands allowing to project the concept in particular contexts and through specific angles of analysis Arrivals and Departures Otto Latva, Heta Lähdesmäki, Kirsi Sonck-Rautio, Harri Uusitalo, 2024-05-13 Is a River Alive? of contemporary eco criticism They make the case for seeing the worldview depicted in Ovid's poem as an exemplar of the premodern ecological mindset that contemporary environmental thought seeks to approximate They also highlight critical moments in the history of the poem's ecological reception including reflections by a contemporary poet as well as studies of Medieval and Renaissance responses to Ovid **Towards Critical Environmental Education** Aristotelis S. Gkiolmas, Constantine D. Skordoulis, 2020-11-03 This volume discusses theory philosophy praxis and methods in Environmental and Ecological education and considers the junction with the main visions and issues of Critical Pedagogy The volume and its separate chapters address four axes which can also be seen as the guidelines of the content as well as the central objectives of the book The first axis concerns the missing theoretical and practical pieces at this point in time The volume considers the issues that are not included in contemporary Environmental Education and thus deprive it from critical orientations This implies that in Environmental Education very little discussion exists about the political economic racial gender and class issues that in most cases govern the actions of leaders and stake holders. The second axis concerns what has been done so far and in what directions This involves descriptions of theoretical approaches or actual applied methodologies in the classroom such as curricula or syllabus used or the kind of actions certain educators have taken to infuse the issues of justice and critical reflection within the Environmental Education teaching agenda The third axis examines proposals It looks at ways to enrich domains of Environmental Education with the argumentations of Critical Pedagogy The fourth axis concerns the way in which proposals can be effectuated This part contains specific methodologies and teaching sequences depicting ways of including major aspects of Critical Pedagogy and Critical Education in Environmental Education Examples are Non anthropocentric ecological approaches in the classroom political activism in the Curricula mixture of field activities and political activities Kierkegaardian Essays Clare Carlisle, Steven Shakespeare, 2022-04-19 S ren Kierkegaard argued that the most essential truths come to light by asking How This innovative collection of essays by leading scholars focuses on this questioning How asking how we should relate to ourselves to others and to God how we should be in the world how we can become human The result is a searching original colloquium on what it means to be Kierkegaardian in the 21st century The adjective Kierkegaardian names many possibilities ways of philosophizing choosing loving looking listening reading writing teaching making art praying going to church or not going to church How gestures to subjectivity one of Kierkegaard s most fundamental philosophical categories while What signals an objectifying line of thought The authors of these essays suggest that the crucial Kierkegaardian question is not what we are and ought to do but how we can remain true to the finitude passivity and ambiguity of human existence While this Kierkegaardian how is often acknowledged by scholars it is rarely thematized directly Attending to it elicits new kinds of argument and reflection Kierkegaardian Essays proposes a fresh approach to Kierkegaard and is essential reading for experts and students alike The Virus Touch Bishnupriva Ghosh, 2023-03-06 In The Virus Touch Bishnupriya Ghosh argues that media are central to understanding emergent relations

between viruses humans and nonhuman life Writing in the shadow of the HIV AIDS and COVID 19 global pandemics Ghosh theorizes epidemic media to show how epidemics are mediated in images numbers and movements through the processes of reading test results and tracking infection and mortality rates Scientific artistic and activist epidemic media that make multispecies relations sensible and manageable eschew anthropocentric survival strategies and instead recast global public health crises as biological social and ecological catastrophes pushing us toward a multispecies politics of health Ghosh trains her analytic gaze on these mediations as expressed in the collection and analysis of blood samples as a form of viral media the geospatialization of data that track viral hosts like wild primates and the use of multisensory images to trace fluctuations in viral mutations Studying how epidemic media inscribe store and transmit multispecies relations attunes us to the anthropogenic drivers of pathogenicity like deforestation or illegal wildlife trading and the vulnerabilities accruing from diseases that arise from socioeconomic inequities and biopolitical neglect **Doing Anthropology** Simone Dennis, Andrew Dawson, 2022-12-30 This textbook is written by well established anthropology professors for and with their undergraduate students It explores what anthropological thinking is what anthropological approaches are and how these are applied in real world settings It provides a thorough introduction to key methods theories and the disciplinary value of contemporary anthropology This book deliberately steps beyond the standard textbook format Undergraduate students reveal the processes by which they came to understand and apply anthropological knowledge using everyday experiences and common life events as examples while also showcasing the practical learning that student authors produced as a result of understanding and operationalising those processes This fresh take showcases what can be done with anthropological knowledge not what you can do with anthropology when you ve achieved the rank of professor This book is accompanied by practical exercises and podcasts that relate to each of the chapters Podcasts extend beyond the textbook as live resources with episodes on a regular basis This is an accessible lively active text that prepares students to outbound disciplinary knowledge This unique and engaging textbook will be core reading for undergraduate anthropology students as well as a source of teaching inspiration for lecturers of undergraduate anthropology units It would also be a useful text for undergraduate students conducting Quinine's Remains Townsend Middleton, 2024-04-30 A free ebook version of this title is available ethnographic research through Luminos University of California Press s Open Access publishing program Visit www luminosoa org to learn more What happens after colonial industries have run their course after the factory closes and the fields go fallow Set in the cinchona plantations of India s Darjeeling Hills Quinine s Remains chronicles the history and aftermaths of quinine Harvested from cinchona bark quinine was malaria s only remedy until the twentieth century advent of synthetic drugs and it was vital to the British Empire Today the cinchona plantations and the roughly fifty thousand people who call them home remain Their futures however are unclear The Indian government has threatened to privatize or shut down this seemingly obsolete and crumbling industry but the plantation community led by strident trade unions has successfully resisted Overgrown cinchona
