S. Hall,2007-06-16 The authors reexamine world development usually the province of economists as professionals trained in the natural sciences They show how we have and might use tested scientific and technical procedures and concepts as well as science itself to achieve much better results than what has been characteristic of the past Leclerc and Hall contend that to scholars with a scientific background the process of development and the economic logic behind it often look almost surrealistic The basic question at the foundation of this review is this Why should something so important as world development something capable

of absorbing such vast sums of money and of human goodwill something that impacts the people and the environment so much continue to be organized and planned using economic techniques and theories that are both unconfirmed experimentally and proven to have led to development failures BOOK JACKET
