Experiencing the Impossible Gustav Kuhn,2019-03-12 This thought provoking tour through the science of magic will make you question what you know about your brain and your reality A psychologist and magician shows how the scientific study of magic reveals intriguing and often unsettling insights into the mysteries of the human mind What do we see when we watch a magician pull a rabbit out of

a hat or read a person's mind. We are captivated by an illusion; we applaud the fact that we have been fooled. Why do we enjoy experiencing what seems clearly impossible or at least beyond our powers of explanation? In *Experiencing the Impossible*, Gustav Kuhn examines the psychological processes that underpin our experience of magic. Kuhn, a psychologist and a magician, reveals the intriguing and often unsettling insights into the human mind that the scientific study of magic provides. Magic Kuhn explains creates a cognitive conflict between what we believe to be true—for example, a rabbit could not be in that hat—and what we experience: a rabbit has just come out of that hat. Drawing on the latest psychological, neurological, and philosophical research, he suggests that misdirection is at the heart of all magic tricks and he offers a scientific theory of misdirection. He explores among other topics our propensity for magical thinking, the malleability of our perceptual experiences, forgetting and misremembering, free will and mind control, and how magic is applied outside entertainment: the use of illusion in human-computer interaction, politics, warfare, and elsewhere. We may be surprised to learn how little of the world we actually perceive, how little we can trust what we see and remember, and how little we are in charge of our thoughts and actions. Exploring magic, Kuhn illuminates the complex and almost magical mechanisms underlying our daily activities.

Poisoner in Chief Stephen Kinzer, 2019-09-10. The bestselling author of *All the Shah's Men* and *The Brothers* tells the astonishing story of the man who oversaw the CIA's secret drug and mind control experiments of the 1950s and 60s. The visionary chemist Sidney Gottlieb was the CIA's master magician and gentlehearted torturer, the agency's poisoner in chief. As head of the MK ULTRA mind control project, he directed brutal experiments at secret prisons on three continents. He made pills, powders, and potions that could kill or maim without a trace, including some intended for Fidel Castro and other foreign leaders. He paid prostitutes to lure clients to CIA-run bordellos where they were secretly dosed with mind-altering drugs. His experiments spread LSD across the United States, making him a hidden godfather of the 1960s counterculture. For years, he was the chief supplier of spy tools used by CIA officers around the world. Stephen Kinzer, author of groundbreaking books about U.S. clandestine operations, draws on new documentary research and original interviews to bring to life one of the most powerful unknown Americans of the twentieth century. Gottlieb's reckless experiments on expendable human subjects destroyed many lives, yet he considered himself deeply spiritual. He lived in a remote cabin without running water, meditated, and rose before dawn to milk his goats. During his twenty-two years at the CIA, Gottlieb worked in the deepest secrecy. Only since his death has it become possible to piece together his astonishing career at the intersection of extreme science and covert action. *Poisoner in Chief* reveals him as a clandestine conjurer on an epic scale. *American Torture from the Philippines to Iraq* William L. d'Ambruso, 2021-11-26. What explains the United States' persistent use of torture over the past hundred-plus years? Not only is torture incompatible with liberal values, it is also risky and frequently ineffective as an interrogation method. Drawing on archival testimony from the Philippine-American War (1899-1902), the Vietnam War, and the post-2001 war on terror, William L. d'Ambruso argues that the norm against torture includes features that help explain why
