Phenomenological Aspects of Wittgenstein's Philosophy B.-C. Park, 2012-12-06 In his writings around 1930 Wittgenstein relates his philosophy in different ways to the idea of phenomenology He indicates that his main philosophical project had earlier been the construction of a purely phenomenological language and even after having given up this project he believed that the world we live in is the world of sense data that is of phenomenological objects However a problem is posed by the fact that he does not appear ever to have given a full explicit account of what he means by his phenomenology phenomenological language or phenomenological problems In this book I have tried to unravel the nature of Wittgenstein's phenomenology and to examine its importance for his entire work in philosophy Phenomenology can be characterized as philosophy whose primary concern is what is immediately given in one's experience This immediately given is not merely impressions inside one's mind but includes also the part of objective reality that impinges upon one's consciousness Thus an aim of phenomenological enterprise is to grasp this objective reality by attending to immediate experience Husserl's phenomenology is in fact a case in point

Morris,1991-09-09 This is a book about the meanings we make out of pain The greatest surprise I encountered in discussing this topic over the past ten years was the consistency with which I was asked a single unvarying question Are you writing about physical pain or mental pain The overwhelming consistency of this response convinces me that modern culture rests upon and underlying belief so strong that it grips us with the force of a founding myth Call it the Myth of Two Pains We live in an era when many people believe as a basic unexamined foundation of thought that pain comes divided into separate types physical and mental These two types of pain so the myth goes are as different as land and sea You feel physical pain if your arm breaks and you feel mental pain if your heart breaks Between these two different events we seem to imagine a gulf so wide and deep that it might as well be filled by a sea that is impossible to navigate The Therapy of Pain M. Swerdlow,2013-03-13 The past few years have seen the publication of a large number of articles and not a few books on the subject of relief of intractable pain New ideas have been put forward on pain mechanisms new methods of treatment have been reported and improved results claimed and a growing catalogue of complications of treatment has been recorded The vast and expanding literature on the subject poses for the reader the dual problems of surveillance and of assessment The object of the present book is to provide a critical and constructive review of current writings and ideas on a wide range of aspects of the nature of intractable pain particularly of present day practice and new ideas on treatment Each chapter is written by an acknowledged authority and the approach throughout is practical rather than academic In editing the individual chapters an effort was made to achieve a contemporary approach and to eliminate material which was unduly historical or retrospective in content At the same time the individual style of the authors was retained as far as possible For decades chronic pain has been a therapeutic no man's land For the surgeon pain was an unfortunate complication which not infrequently followed surgery for the physician it was a distressing symptom in a number of disease syndromes to the psychiatrist it was one of a number of features in many cases of mental illness **Cinema, Pain and Pleasure** Steven Allen,2013-03-28 From *Tattoo to Saw* this book considers mainstream cinema's representation of the viscerally dominated and marked body Examining a shift in the late twentieth century to narratives that highlight subjection endurance and willed acquiescence it probes the confluence of pain pleasure and consent to analyse the implications of the change Making Sense of the Unseen Pain Sharifah Nadirah,2024-03-24 People with mental health issues are often stigmatised by society and their friends and family to the extent that they feel grateful when they come across a stranger who understands their invisible pain Journeying through the author's personal experience in living with mental illness it inspires her to write

advocate and raise awareness in the community Through this book the author shares a snippet of the sharp and painful truth about what it feels like living with mental illness while dealing with biased community around us There is more to mental health than just self love and self care It has been truly liberating to be able to understand more about what we are experiencing accepting ourselves and be more compassionate

Pain Patrick David Wall,2000 Pain is one of medicine s greatest mysteries When farmer John Mitson caught his hand in a baler he cut off his trapped hand and carried it to a neighbor Sheer survival and logic was how he described it And strangely I didn t feel any pain How can this be We re taught that pain is a warning message to be heeded at all costs yet it can switch off in the most agonizing circumstances or switch on for no apparent reason Many scientists philosophers and laypeople imagine pain to operate like a rigid simple signaling system as if a particular injury generates a fixed amount of pain that simply gets transmitted to the brain yet this mechanistic model is woefully lacking in the face of the surprising facts about what people and animals do and experience when their bodies are damaged Patrick Wall looks at these questions and sets his scientific account in a broad context interweaving it with a wealth of fascinating and sometimes disturbing historical detail such as famous characters who derived pleasure from pain the unexpected reactions of injured people the role of endorphins and the power of placebo He covers cures of pain ranging from drugs and surgery through relaxation techniques and exercise to acupuncture electrical nerve stimulation and herbalism Pain involves our state of mind our social mores and beliefs and our personal experiences and expectations Stepping beyond the famous neurologic gate control theory for which he is known Wall shows that pain is a matter of behavior and its manifestation differs among individuals situations and cultures The way we deal with pain is an expression of individuality
