The Oxford History of Anglicanism, Volume V William L. Sachs, 2017-12-15 The Oxford History of Anglicanism provides a global study of Anglicanism from the sixteenth century to the twenty first The five volumes in the series look at how Anglican identity was constructed and contested since the English Reformation of the sixteenth century and examine its historical influence during the past six centuries They consider not only the ecclesiastical and theological aspects of global Anglicanism but also the political social economic and cultural influences of this form of Christianity that has been historically significant in Western culture and a burgeoning force in non Western societies since the nineteenth century Written by international experts in their various historical fields each volume analyses the varieties of Anglicanism that have emerged The series also highlights the formal political institutional and ecclesiastical forces that have shaped a global Anglicanism and the interaction of Anglicanism with informal and external influences which have both moulded Anglicanism and been fashioned by it Volume five of The Oxford History of Anglicanism considers the global experience of the Church of England in mission and in the transitions of its mission Churches towards autonomy in the twentieth century The Church developed institutionally yet more than the institutional history of the Church of England and its spheres of influence is probed The contributors focus on what it has meant to be Anglican in diverse contexts What spread from England was not simply a religious institution but the religious tradition it intended to implant The volume addresses questions of the conduct of mission its intended and unintended consequences It offers important insights on what decolonization meant for Anglicans as the mission Church in various global locations became self reliant This study breaks new ground in describing the emergence of an Anglicanism

shaped more contextually than externally It illustrates how Anglicanism became enculturated across a broad swath of cultural contexts The influence of context and the challenge of adaption to it framed Anglicanism s twentieth century experience

Religion and Development in the Asia-Pacific Matthew Clarke, Anna Halafoff, 2016-08-25 Community development is most effective and efficient when it is situated and led at the local level and considers the social behaviours needs and worldviews of local communities With more than eight out of ten people globally self reporting religious belief Religion and Development in the Asia Pacific Sacred places as development spaces argues that the role and

impact of religions on community development needs to be better understood. It also calls for greater attention to be given to the role of sacred places as sites for development activities and for a deeper appreciation of the way in which sacred stories and teachings inspire people to work for the benefit of others in particular locations. The book considers theories of place as a component of successful development interventions and expands this analysis to consider the specific role that sacred places, buildings and social networks have in planning, implementing and promoting sustainable development. A series of case studies examine various sacred places as sites for development activities. These case studies include Christian churches and disaster relief in Vanuatu; Muslim shrines and welfare provision in Pakistan; a women's Buddhist monastery in Thailand; advancing gender equity; a Jewish aid organisation providing language training to Muslim Women in Australia; and Hawaiian sacred sites located within a holistic retreat centre committed to ecological sustainability.

Religion and Development in the Asia Pacific demonstrates the important role that sacred spaces can play in development interventions covering diverse major world religions, interfaith and spiritual contexts, and as such will be of considerable interest for postgraduate students and researchers in development studies, religious studies, sociology of religion and geography. Emma Tomalin, 2015-02-11. This Handbook provides a cutting edge survey of the state of research on religions and global development. Part one highlights critical debates that have emerged within research on religions and development, particularly with respect to theoretical, conceptual and methodological considerations from the perspective of development studies and its associated disciplines. Parts two to six look at different regional and national development contexts and the place of religion within these. These parts integrate and examine the critical debates raised in part one within empirical case studies from a range of religions and regions. Different religions are situated within actual locations and case studies, thus allowing a detailed and contextual understanding of their relationships to development to emerge. Part seven examines the links between some important areas within development policy and practice where religion is now being considered, including Faith Based Organisations and Development, Public Health, Religion and Development, Human rights, Religion and Development, Sustainable Development, Climate Change and Religion, Global Institutions and Religious Engagement in Development, Economic Development and Religion, Religion Development and Fragile States, Development and Faith Based Education. Taking a global approach, the Handbook covers Africa, Latin America, South Asia, East and South East Asia, and the Middle East.
