Knowledge in Action Annemarie van Paassen, Jolanda van den Berg, Eveliëne Steingröver, Renate Werkman, Bas Pedroli, 2011-10-05 Wageningen University and Research Centre is known for its practical and societally relevant research in spatial development. Stakeholders currently put much emphasis on participatory processes in landscape planning procedures. This poses a special challenge for research. What role does research play in our present world characterised by complexity, competing claims and development needs and an increased concern for climate change and environmental impact? In the book *Knowledge in Action* we explore different types of transdisciplinary research that scientists engage in. Depending on the societal context and the interests of local citizens, researchers apply different research approaches to optimally incorporate the various points of view in their research and promote processes enhancing dialogue and shared results. In the book, authors present their research experiences, their theoretical inspiration, the research methodology applied to consult, share and collaborate with societal actors in order to create options for change. The book includes several striking examples from The Netherlands, both successful and less effective, and also innovative examples from communities in Africa and Asia. The authors reflect on opportunities, problems and dilemmas they had to deal with. They especially address how far the role and theoretical perspectives of collaborative researchers can lead them in action research. Can they limit themselves to joint knowledge production and learning processes, or should they engage in strategic positioning, advocacy and entrepreneurship to make it happen? The book discusses the issues that researchers should consider when they position their research activities within ongoing developments at landscape level. Read the book and judge for yourself. [Analyzing American Democracy](#) Jon R. Bond, Kevin B. Smith, 2013-05-29 *Analyzing American Democracy* teaches students to think analytically by presenting current political science theories and research in answering the engaging big questions facing American politics today. It serves as both an introduction to American politics and to the discipline of political science by reflecting the theoretical developments and empirical inquiry conducted by researchers. Every chapter highlights the most current research and discusses related public policy. It demonstrates for students how to think critically and analytically, bringing theoretical insight to contemporary American politics. More than just a comprehensive overview and description of how American politics works, Jon Bond and Kevin Smith demonstrate how politics can be studied systematically. Throughout the text, they introduce students to the insights gleaned from rational choice, behavioral and biological approaches to politics. Understanding these three social scientific models and their applications helps students get the most out of their American government course and out of this text; they learn a way of thinking that they can use to make sense of future challenges facing the American polity. A number of features help aid comprehension and critical thinking. Key Questions at the start of every chapter frame the learning objectives and concepts. Politics in Practice boxes in every chapter encourage students to think critically about how practice compares with theory. Tables, Figures, Charts and Maps throughout present the empirical details of American politics.

helping students gain quantitative literacy Top Ten Takeaway Points at the end of every chapter recap the most important points covered but also help students discern the general principles that make sense of the numerous factual details Key Terms are bolded in the text defined in the margins recapped at the end of the chapter and compiled in a glossary all to help insure that students can effortlessly master the vocabulary of American politics and political science in order to move on to the more important concepts
