*Metron* Corrado Gini, 2004 Includes list of publications received **Metron**, 1994 *Advanced Methods in Statistics, Data Science and Related Applications* Matilde Bini, Antonio Balzanella, Lucio Masserini, Rosanna Verde, 2024-10-16 This book contains a selection of the improved contributions submitted by participants at the conference of the Italian Statistical Society SIS 2022 held in Caserta 22-24 June 2022. The scientific community of Italian statistics which gathers around the SIS is paying particular attention to the development of statistical techniques increasingly oriented toward the processing of large data, mainly of complex data. The main goal is to provide the analysis of the data and the interpretability of the obtained results with a view to decision support and the reliability of the data outcomes. The aim of this volume is to show some of the most relevant contributions of statistical and data analysis methods in preserving the quality of the information to be processed, especially when it comes from different, often non-official sources as well as in the extraction of knowledge from complex data, textual, network, unstructured and multivalued, and in the explicability of results. Data Science today represents a broad domain of knowledge development from data where statistical and data analysis methods can make an important contribution in the different domains where data management and processing are required. This volume is addressed to researchers but also to Ph.D. and M.Sc. students in the field of Statistics and Data Science to acquaint them with some of the most recent developments towards which statistical research is orienting in prevalence in Italy. *The Advocate*, 2001-08-14.
