Artificial Intelligence and the Future of Human Relations Yanto Chandra, Ruiping Fan, 2025-09-26 This book stimulates new conversations around the ethical and policy considerations stemming from the influence of artificial intelligence AI on human relationships within a cross cultural perspective With chapters from distinguished scholars from Eastern and Western backgrounds it delves into the fundamental aspects of human connections and good governance examining them through the perspectives of both Eastern and Western values while addressing the implications of AI While the recognition of AI's substantial challenges to human values and effective governance is widespread there exists a notable lack of focus on its impact on the essential human relationships that embody these values and encompass human identity

within Eastern and Western traditions By centering attention on this aspect the book highlights a critical concern for the development of AI that is suitable for the future of human relationships and good governance Specifically the book seeks to examine the influence of AI on essential human relationships such as those between parent and child spouses the elderly and the young physician and patient as well as relations between friends citizens and nations It is an essential resource relevant to academics in philosophy applied ethics and bioethics AI ethics social and political philosophy **The Real Planet of the Apes** David R. Conway, 2012-05-17 Can the psychodynamics of the mind be correlated with neurodynamic processes in the brain The book revisits a question that scientists and psychoanalysts have been asking for more than a century It brings together experts from Psychology Psychoanalysis Neuroscience Philosophy Psychiatry and Neurology to consider this question **Power User's Guide to 1-2-3** E. Michael Lunsford, Peter Antoniak, 1988 Animal Ethos Lesley A.
