The Evolution of Death the follow up to Becoming Immortal Combining Cloning and Stem Cell Therapy also published by SUNY Press Stanley Shostak argues that death like life can evolve Observing that literature philosophy religion genetics physics and gerontology still struggle to explain why we die Shostak explores the mystery of death from a biological perspective Death Shostak claims is not the end of a linear journey static and indifferent to change Instead he suggests the current efforts to live longer have profoundly affected our ecological niche and we are evolving into a long lived species Pointing to the artificial means currently used to prolong life he argues that as we become increasingly juvenilized in our adult life death will become significantly and evolutionarily delayed As bodies evolve the embryos of succeeding generations may be accumulating the stem cells that preserve and restore providing the resources necessary to live longer and longer If trends like this continue Shostak contends future human beings may join the ranks of other animals with indefinite life spans
