Seduction Rachel O'Neill, 2018-06-28 Within the so-called seduction community the ability to meet and attract women is understood as a skill which heterosexual men can cultivate through practical training and personal development Though it has been an object of media speculation and frequent sensationalism for over a decade this cultural formation remains poorly understood In the first book-length study of the industry Rachel O'Neill takes us into the world of seduction seminars training events instructional guidebooks and video tutorials Pushing past established understandings of pickup artists as pathetic pathological or perverse she examines what makes seduction so compelling for those drawn to participate in this sphere Seduction vividly portrays how the twin rationalities of neoliberalism and postfeminism are reorganising contemporary intimate life as labour-intensive and profit-orientated modes of sociality consume other forms of being and relating It is essential reading for students and scholars of gender sexuality sociology and

cultural studies as well as anyone who wants to understand the seduction industry's overarching logics and internal workings

Attraction Explained Viren Swami, 2015-12-22 How much does appearance matter in the formation of romantic relationships? Do nice guys always finish last? Does playing hard to get ever work? What really makes for a good chat up line? When it comes to relationships, there's no shortage of advice from self-help experts, pickup artists, and glossy magazines. But modern-day myths of attraction often have no basis in fact or worse are rooted in little more than misogyny. In *Attraction Explained*, psychologist Viren Swami debunks these myths and draws on cutting-edge research to provide a ground-breaking and evidence-based account of relationship formation. At the core of this book is a very simple idea: there are no laws of attraction, no foolproof methods or strategies for getting someone to date you. But this isn't to say that there's nothing to be gained from studying attraction. Based on science rather than self-help clichés, *Attraction Explained* looks at how factors such as geography, appearance, personality, and similarity affect who we fall for and why. *The Game of Seduction: how to become a modern-day "Casanova" and take beautiful women to bed.* John Lougan, 2023-09-15 Have you ever wondered how the most confident and seductive men manage to attract women so easily? What makes a man irresistible in their eyes? Get ready to discover the secrets behind seduction and become a true master in the game of attraction. In *The game of seduction: how to become a modern Casanova and take beautiful women to bed* by John Lougan, you will learn how to develop true masculinity, self-confidence, charisma, and presence qualities that make any man irresistible to women. Written by one of the most influential Brazilian experts in seduction and social dynamics with over fifteen years of hands-on experience, *The game of seduction* delves into the deep roots of attraction from its origins spanning through Don Juan and Giacomo Casanova and reveals the principles used by the greatest modern masters of attraction known as Pickup Artists (PUAs) to attract beautiful women and stand out in life, social interactions, and careers. With a practical and direct approach, this book will teach you how to become an Alpha Male, invest in your personal and professional development, achieve financial independence, take care of your health, improve your self-image, body language, style, and even your tone of voice so you become the kind of man all women notice. You will master the art of interacting with women in any situation, whether at a party, a bar, or even on the phone, day or night. You will learn powerful strategies to create real connections and become a truly irresistible man. This book also includes references to experts on the topics covered, such as Giacomo Casanova, Robert Greene, Eric Weber, Stephen Covey, Maxwell Maltz, Dale Carnegie, James Clear, Neil Strauss, Tom Ford, Albert Mehrabian, Tony Robbins, Erik Von Markovik, among others. *The game of seduction* is not a book about conquest techniques; it's a true journey of personal transformation. With it, you'll become the kind of man who attracts, seduces, and keeps women in your life. Ready to master the game and make a turnaround in your love life? Influence Wesley Felt, This book contains two titles Here are some snippets of what you can find in there Book 1 In today's world our perception fundamentally shapes our reality This explains why two people can have entirely different interpretations of the same event The meaning we assign to events stems from our beliefs and emotions So can altering our perception actually change our world If so how can this be achieved And if it's possible how can we mold our reality to create a better one What we see defines what we believe and what we believe dictates what we consider true Our sense of truth then becomes our reality Thus our perception molds our reality Although we share the same world we each focus on our own perceived truths Even though everyone has eyes each person views the world in a unique way It's easy to find what we're looking for but harder to notice what we're not searching for For example one person might see a glass as half full while another sees it as half empty Book 2 Gender does influence persuasion largely due to the emotional and intellectual differences between men and women It is often believed that the direct straightforward approach typically associated with men is more effective in persuasion than the emotionally nuanced methods often attributed to women One of the key differences between men and women is that

men are primarily visually stimulated This trait while sometimes criticized as shallow is rooted in our DNA and evolution Historically men were driven to seek healthy partners for reproduction as visual cues were the primary way to assess health before the advent of modern medicine In the days of early human society a woman of child bearing age who appeared healthy was naturally attractive to men as it signaled good prospects for offspring *The Most Human Human* Brian Christian,2012-03-06 A playful profound book that is not only a testament to one man s efforts to be deemed more human than a computer but also a rollicking exploration of what it means to be human in the first place Terrific Art and science meet an engaged mind and the friction produces real fire The New Yorker Each year the AI community convenes to administer the famous and famously controversial Turing test pitting sophisticated software programs against humans to determine if a computer can think The machine that most often fools the judges wins the Most Human Computer Award But there is also a prize strange and intriguing for the Most Human Human Brian Christian a young poet with degrees in computer science and philosophy was chosen to participate in a recent competition This **Love Online** Jean-Claude Kaufmann,2012-03-05 A study of the relationship between the internet and relationships that investigates whether we can ever really combine sex and feelings instant gratification and enduring commitment using the example of one night stands arranged via online dating sites **The Routledge Companion to Masculinity in American Literature and Culture** Lydia R. Cooper,2021-12-26 Recently the U S has seen a rise in misogynistic and race based violence perpetrated by men expressing a sense of grievance from incels to alt right activists Grounding sociological historical political and economic analyses of masculinity through the lens of cultural narratives in many forms and expressions The Routledge Companion to Masculinity in American Literature and Culture suggests that how we examine the stories that shape us in turn shapes our understanding of our current reality and gives us language for imagining better futures Masculinity is more than a description of traits associated with particular performances of gender It is more than a study of gender and social power It is an examination of the ways in which gender affects our capacity to engage ethically with each other in complex human societies This volume offers essays from a range of established global experts in American masculinity as well as new and upcoming scholars in order to explore not just what masculinity once meant has come to mean and may mean in the future in the U S it also articulates what is at stake with our conceptions of masculinity *Sexuality Education* Elizabeth Schroeder,Judy Kuriansky,2009-04-30 An exemplary team of professionals provides a comprehensive look at sex education the heated debate over federal controls current research and practice programs politics legislation and cultural and religious issues related to sex and sexuality education In the groundbreaking *Sexuality Education Past Present and Future* the history practices and politics of sexuality education are explained Respected educators counselors and therapists marshal both research and educated opinion to offer insights into exactly what is meant by sex education what the various approaches are what age appropriate lessons are supported by most professionals and the impact of government policies Noting that the need for sexuality education has expanded to adults from

new parents to senior citizens this unique work also takes readers into classrooms and makes them privy to conversations representing everyone from elementary school students to nursing home residents These comments reveal the range of unanswered questions about sex questions that are important for psychological as well as physical health In addition the contributors explore ongoing issues in sexuality education such as how to present culturally competent lessons that include consideration of race ethnicity gender religion and sexual orientation The experts also examine sexuality education in other countries the challenges those countries face and their victories over unplanned pregnancy and STDs in the global effort to preserve sexual health

The Biased Mind Jérôme Boutang, Michel De Lara, 2015-09-15 Using a wealth of anecdotes data from academic literature and original research this very accessible little book highlights how we all struggle to cope with the maelstrom of choices influences and experiences that come our way The authors have slogged through piles of dry research papers to provide many wonderful nuggets of information and surprising insights For example Why is an upside down red triangle such a powerful warning sign on the road What is the best kind of alibi What makes the number 7 so special Why is it better to whisper words of love into the left ear Will that recent marriage last Why is it that the French eat snails but not slugs The reader will discover the amazing tools and shortcuts that millennia of evolution have built into our brains And this knowledge is power Knowing more about how the human mind connects the dots helps us understand why decision making is so tricky With insights from evolutionary psychology we become better equipped to understand ourselves and others and to interact and communicate more effectively
