makes a strong case that close investigation both biographical and textual into the composition of the Tractatus and into the various influences on it still has much to yield in revealing the complexity and fertility of Wittgenstein's early thought. Amongst these influences Kant and Kierkegaard are considered alongside Wittgenstein's immediate predecessors in the analytic tradition. The themes explored range across the breadth of Wittgenstein's book and include his accounts of ethics and aesthetics as well as issues in metaphysics and the philosophy of mind and aspects of the logical framework of his account of representation. The contrast of saying and showing and Wittgenstein's attitude to the inexpressible is of central importance to many of the contributions. By approaching this concern through the various first level issues that give rise to it rather than from entrenched schematic positions the contributors demonstrate the possibility of a more inclusive, constructive and fruitful mode of engagement with Wittgenstein's text and with each other.
