Allen Smutylo has experienced some of the wildest and most captivating waters imaginable in all corners of the globe. The stories in *The Memory of Water* all of them accompanied by the author's own stunning artwork describe his adventures in the Arctic, South Pacific, Great Lakes region and India. In the Arctic he is attacked by a polar bear, stalked by a rogue walrus and nearly drowns in ferocious waters. But his Arctic stories also celebrate human creativity as they recount the life of the pre-Inuit people who hunting in a changing environment endured many hardships and developed new technologies such as the sea kayak to cope. Other stories include an account of a sojourn in a small Georgian Bay fishing village as a young artist, an adventure on an urban river in southwestern Ontario and a portrayal of the complex underwater world of the South Pacific. Travelling the River Ganges in India, the author finds that a massive misuse of water is complicated by a billion people's faith-based adoration of the same water. *The Memory of Water* probes a crucial and contemporary issue: that of our relationship to water and the wildlife and human life that depends upon it. This book will appeal to anyone interested in the natural world, in artistic depictions of it, or in a good story well told. *The Sun: Its Planets and Their Satellites* Edmund Ledger, 1882 **On**

Young, 2018-10-01 November 11, 2018, is the 100th anniversary of the end of the First World War, a time of remembering and memorial, of linking past events to the world we live in today. Taking this particular moment as a catalyst, this book examines the character and relevance of memory more broadly. The essays in this collection ask readers to think creatively and deeply about notions of memory, its composition and practices, and the ways that memory is transmitted, recorded, and distorted through time and space. Memory navigates a broad terrain with essays drawn from a diverse group of contributors who capture different perspectives on the idea of memory in fields ranging from molecular genetics, astrophysics, and engineering to law, Indigenous oral histories, and the natural world. This book challenges readers to think critically about memory, offering an engaging and interdisciplinary roadmap for exploring how, why, and when we remember. *Notes to Assist the Memory in Various Sciences. [By W. Hamilton.]* Walter Hamilton (M.R.A.S.), 1825 **Autistic Dreaming** Anna Reading, 2025-08-01

The relationship between storytelling, neurodiversity, and memory remains critically overlooked. While scholarship recognizes the presence of neurodiverse thinking in popular folktales, and access to works by autistic people is growing, the opportunity neurodiverse storytelling offers to reshape communication and remembrance is largely neglected. *Autistic Dreaming* illuminates how the integration of neurodivergent perspectives can expand ideas of polysensory memory and the connection between human and more-than-human memory. Focusing on autistic activists, blogs, memoirs, artworks, and films, this study spotlights a neuroqueer method of remembering that reforges links between the present and the past, and the individual and collective.
