Fictions of Credit in the Age of Shakespeare Laura Kolb, 2021-02-04 In Shakespeare's England credit was synonymous with reputation and reputation developed in the interplay of language conduct and social interpretation As a consequence artful language and social hermeneutics became practical profitable skills Since most people both used credit and extended it the dual strategies of implication and inference of producing and reading evidence were everywhere Like poetry or drama credit was constructed fashioned out of the interplay of artifice and interpretation The rhetorical dimension of economic relations produced social fictions on a range of scales from transitory performances facilitating local transactions to the long term project of maintaining creditworthiness to the generalized social indeterminacy that arose from the interplay of performance and interpretation Fictions of Credit in the Age of Shakespeare examines how Shakespeare and his contemporaries represented credit driven artifice and interpretation on the early modern stage It also analyses a range of practical texts including commercial arithmetics letter writing manuals legal formularies and tables of interest which offered strategies for generating credit and managing debt Looking at plays and practical texts together Fictions of Credit argues that both types of writing constitute equipment for living practical texts by offering concrete strategies for navigating England's culture of credit and plays by exploring the limits of credit's dangers and possibilities In their representations of a world re-written by debt relations dramatic texts in particular articulate a phenomenology of economic life telling us what it feels like to live in credit culture to live that is inside a fiction

The Economic Thought of William Petty Hugh Goodacre, 2018-05-11 William Petty 1623-1687 long recognised as a founding father of English political economy was actively involved in the military colonial administration of Ireland following its invasion by Oliver Cromwell and to the end of his days continued to devise schemes for securing England's continued domination of that country It was in that context that he elaborated his economic ideas which consequently reflect the world of military bureaucratic officialdom neo-feudalism and colonialism he served This book shows that much of the theory and methodology in use within the economics discipline of today has its roots in the writings of Petty and his contemporaries rather than in the supposedly universalistic and enlightened ideals of Adam Smith a century later Many of the fundamental ideas of today's development economics for example are shown to have been deployed by Petty explicitly for the purpose of furthering England's colonialist objectives while his pioneering writings on fiscal issues and national accounting theory were equally explicitly directed towards the raising of funds for England's predatory colonial and commercial wars This book argues that exploring the historical roots of economic ideas and methods in this way is an essential aspect of assessing their appropriateness and analytical power today and that this is more relevant than ever It will be of interest to advanced students and researchers in the history of economic thought early modern economic history development economics and economic geography

Harmony and the Balance Andrea Lynne Finkelstein, 2009-12-21 Places the work of major economic writers of seventeenth century England within the

broader context of the intellectual revolutions of the period **Sick Economies** Jonathan Gil Harris, 2013-07-17 From French Physiocrat theories of the blood like circulation of wealth to Adam Smith's invisible hand of the market the body has played a crucial role in Western perceptions of the economic In Renaissance culture however the dominant bodily metaphors for national wealth and economy were derived from the relatively new language of infectious disease Whereas traditional Galenic medicine had understood illness as a state of imbalance within the body early modern writers increasingly reimagined disease as an invasive foreign agent The rapid rise of global trade in the sixteenth century and the resulting migrations of people money and commodities across national borders contributed to this growing pathologization of the foreign conversely the new trade inflected vocabularies of disease helped writers to represent the contours of national and global economies Grounded in scrupulous analyses of cultural and economic history *Sick Economies* Drama Mercantilism and Disease in Shakespeare's England teases out the double helix of the pathological and the economic in two seemingly disparate spheres of early modern textual production drama and mercantilist writing Of particular interest to this study are the ways English playwrights such as Shakespeare Jonson Heywood Massinger and Middleton and mercantilists such as Malynes Milles Misselden and Mun rooted their conceptions of national economy in the language of disease Some of these diseases syphilis taint canker plague hepatitis have subsequently lost their economic connotations others most notably consumption remain integral to the modern economic lexicon but have by and large shed their pathological senses Breaking new ground by analyzing English mercantilism primarily as a discursive rather than an ideological or economic system *Sick Economies* provides a compelling history of how even in our own time defenses of transnational economy have paradoxically pathologized the foreign In the process Jonathan Gil Harris argues that what we now regard as the discrete sphere of the economic cannot be disentangled from seemingly unrelated domains of Renaissance culture especially medicine and the theater **A History of the Jews and Judaism in the Second Temple Period, Volume 3** Lester L. Geography, Religion, Gods, and Saints in the Eastern Mediterranean Erica Ferg, 2020-01-16 Geography Religion Gods and Saints in the Eastern Mediterranean explores the influence of geography on religion and highlights a largely unknown story of religious history in the Eastern Mediterranean In the Levant agricultural communities of Jews Christians and Muslims jointly venerated and largely shared three important saints or holy figures Jewish Elijah Christian St George and

Muslim al Khi r These figures share peculiar characteristics such as associations with rain greenness fertility and storms Only in the Eastern Mediterranean are Elijah St George and al Khi r shared between religious communities or characterized by these same agricultural attributes attributes that also were shared by regional religious figures from earlier time periods such as the ancient Near Eastern Storm god Baal Hadad and Levantine Zeus This book tells the story of how that came to be and suggests that the figures share specific characteristics over a very long period of time because these motifs were shaped by the geography of the region Ultimately this book suggests that regional geography has influenced regional religion that Judaism Christianity and Islam are not historically or textually speaking separate religious traditions even if Jews Christians and Muslims are members of distinct religious communities and that shared religious practices between members of these and other local religious communities are not unusual Instead shared practices arose out of a common geographical environment and an interconnected religious heritage and are a natural historical feature of religion in the Eastern Mediterranean This volume will be of interest to students of ancient Near Eastern religions Judaism Christianity Islam sainthood agricultural communities in the ancient Near East Middle Eastern religious and cultural history and the relationships between geography and religion

The Jew as Ally of the Muslim Allan Harris Cutler, Helen Elmquist Cutler, 1986 Argues that after the rise of Islam in the seventh century Christian Jewish relations cannot be understood apart from Christian Islamic relations Shows that the outburst of antisemitism in Western Europe after 1000 was due primarily not to the deicide charge or socio economic rivalry but to the clash between Christianity and Islam in which Jews were seen as dangerous allies of the Muslims Analyzes the anti Jewish and anti Muslim polemical literature The Spanish Inquisition too was motivated by racial and political motives in persecuting the Conversos who were sincere converts The unprecedented mass conversions of the Jews of Spain and southern Italy in the late Middle Ages can also be explained by the attraction of Spanish Christian culture with its strong Muslim influence
