The Moving White English Edition:

On Behalf of the Mystical Fool John P. Dourley, 2009-09-30 Jung's explanation of the religious tendency of the psyche addresses many sides of the contemporary debate on religion and the role that it has in individual and social life. This book discusses the emergence of a new mythic consciousness and details ways in which this consciousness supersedes traditional concepts of religion to provide a spirituality of more universal inclusion. On Behalf of the Mystical Fool examines Jung's critique of traditional western religion demonstrating the negative consequences of religious and political collective unconsciousness and their consequent social irresponsibility in today's culture. The book concludes by suggesting that a new religiosity and spirituality is currently emerging in the West based on the individual's access to the sense of ultimacy residual in the psyche and seeking expression in a myth of a much wider compass. This book will be of interest to scholars and students at all levels who are engaged in the expanding field of Jungian studies. It will also be key reading for anyone interested in the theoretical and therapeutic connections between the psyche and religious experience.

Idiot's Guides:

Chess, 3rd Edition Patrick Wolff, 2005-05-03 Written by a U.S. Chess Champion International Chess Grandmaster and longtime instructor, this book includes information for both novice and expert including over 400 illustrated chessboards and photos over 20 pages of detailed answer key notes, a completely new chapter on new evidence about chess and its impact on brain power, a guide to the art of chess collectibles and more. Foreword by Larry Evans, former International Grandmaster and author of 20 highly acclaimed chess books and a popular monthly advice column in Chess Life. For the beginner or the champ and for young and old.

Computers, Chess and Long-Range Planning Michail M. Botvinnik, 2012-12-06

Mihail Moiseevich Botvinnik is an electrical engineer by profession. During World War II he headed a high tension laboratory in the Urals and was decorated by the USSR for his accomplishments. At present he is the head of the alternating current machine laboratory at the Moscow Institute of Power Engineering. He is also a world renowned chess player. He was born in 1911 and by 1935 had become a Grandmaster of Soviet chess. In 1948 he won the world chess championship and held the title until 1963 except for a two year break. His chess style has been characterized as deep, objective, serious and courageous. In this book the quality of his thinking is revealed in his study of the basic thought processes of master chess players and his reduction of these processes to mathematical form. This formalization of thought processes is a contribution to science at three levels: at the immediate level it provides a basis for a computer program that seems likely to succeed in playing chess; at the middle level game playing programs help us to study and rationalize the processes of planning and decision making; and at the highest level the study of the mind in action as in the game of chess leads to an understanding of human thought and of the human psyche.
