End with a strong closing statement.</li> </ul> <p><b>Example:</b> <i>Should schools have a uniform policy?</i></p> <p><b>Introduction:</b> Schools should have a uniform policy because it helps to reduce social inequality and promotes a sense of unity among students.</p> <p><b>Body Paragraph 1:</b> One of the main reasons why schools should have a uniform policy is that it helps to reduce social inequality. When students wear uniforms, they are all dressed alike, which means that no one is wearing more expensive clothes than the others. This helps to prevent students from feeling embarrassed or ashamed of their clothes.</p> <p><b>Body Paragraph 2:</b> Another reason why schools should have a uniform policy is that it promotes a sense of unity among students. When everyone is wearing the same clothes, it creates a sense of belonging and community. This can help to improve the overall school environment and make it a more positive place for students to learn.</p> <p><b>Conclusion:</b> In conclusion, schools should have a uniform policy because it helps to reduce social inequality and promotes a sense of unity among students. This is a simple but effective way to make schools a better place for everyone.</p>

**History & Concepts Parent Lesson Plan** ,2013-08-01 Survey of Science History Concepts Course Description Students will study four areas of science Scientific Mathematics Physics Biology and Chemistry Students will gain an appreciation for how each subject has affected our lives and for the people God revealed wisdom to as they sought to understand Creation Each content area is thoroughly explored giving students a good foundation in each discipline Semester 1 Math and Physics Numbers surround us Just try to make it through a day without using any It s impossible telephone numbers calendars volume settings shoe sizes speed limits weights street numbers microwave timers TV channels and the list goes on and on The many advancements and branches of mathematics were developed through the centuries as people encountered problems and relied upon math to solve them It s amazing how ten simple digits can be used in an endless number of ways to benefit man The development of these ten digits and their many uses is the fascinating story in Exploring the World of Mathematics Physics is a branch of science that many people consider to be too complicated to understand John Hudson Tiner puts this myth to rest as he explains the fascinating world of physics in a way that students can comprehend Did you know that a feather and a lump of lead will fall at the same rate in a vacuum Learn about the history of physics from Aristotle to Galileo to Isaac Newton to the latest advances Discover how the laws of motion and gravity affect everything from the normal activities of everyday life to launching rockets into space Learn about the effects of inertia first hand during fun and informative experiments Exploring the World of Physics is a great tool for student who want to have a deeper understanding of the important and interesting ways that physics affects our lives Semester 2 Biology and Chemistry The field of biology focuses on living things from the smallest microscopic protozoa to the largest mammal In this book you will read and explore the life of plants insects spiders and other arachnids life in water reptiles birds and mammals highlighting God s amazing creation You will learn about biological classification how seeds spread around the world long term storage of energy how biologists learned how the stomach digested food the plant that gave George de Mestral the idea of Velcro and so much more

For most of history biologists used the visible appearance of plants or animals to classify them. They grouped plants or animals with similar looking features into families. Starting in the 1990 s biologists have extracted DNA and RNA from cells as a guide to how plants or animals should be grouped. Like visual structures these reveal the underlying design of creation. Exploring the World of Biology is a fascinating look at life from the smallest proteins and spores to the complex life systems of humans and animals. Chemistry is an amazing branch of science that affects us every day yet few people realize it or even give it much thought. Without chemistry there would be nothing made of plastic there would be no rubber tires no tin cans no televisions no microwave ovens or something as simple as wax paper. This book presents an exciting and intriguing tour through the realm of chemistry as each chapter unfolds with facts and stories about the discoveries of discoverers. Find out why pure gold is not used for jewelry or coins. Join Humphry Davy as he made many chemical discoveries and learn how they shortened his life. See how people in the 1870s could jump over the top of the Washington Monument. Exploring the World of Chemistry brings science to life and is a wonderful learning tool with many illustrations and biographical information.

Applied Science Studies of God s Design in Nature Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student. Materials for each semester are independent of one another to allow flexibility. Made in Heaven Science shamelessly steals from God s creation yet refuses to give God the glory. Discover how the glow of a cat s eyes innovates road reflectors the naturally sticky inspirations for Velcro and barbed wire as well as a fly s ear the lizard s foot the moth s eye and other natural examples are inspiring improvements and new technologies in our lives. Engineers and inventors have long examined God s creation to understand and copy complex proven mechanics of design in the science known as biomimicry. Much of this inspiration is increasingly drawn from amazing aspects of nature including insects to plants to man in search of wisdom and insight. We are surrounded daily by scientific advancements that have become everyday items simply because man is copying from God s incredible creation without acknowledging the Creator. Champions of Invention The great minds of the past are still with us today in many ways. Individuals who explored the natural world hundreds and thousands of years ago have given us a treasure of knowledge in all the sciences. In this exciting series from educator author John Hudson Tiner short biographies of the world s most gifted thinkers will inspire the leaders of tomorrow. Study the life of the forgotten inventor Joseph Henry whose exploration of electricity set the standard for later innovators. Find out how a personal tragedy paved the way for Samuel F B Morse to put aside his painting and develop the telegraph. These valuable learning guides will give students accurate accounts of lives from the halls of science and explain what those scientists believed about the world around them. Discovery of Design From the frontiers of scientific discovery researchers are now taking design elements from the natural world and creating extraordinary breakthroughs that benefit our health our

Scope of the book There is an on going debate regarding the role of labwork in science education which dates back several decades and which illustrates the conviction and interest of teachers researchers and policy makers world wide in the value of laboratory work for understanding science This is evident in more recent books and studies regarding the laboratory which mainly refer to countries with a considerable tradition in practical work in science education Woolnough Alsop 1985 Hodson 1993 Hegarthy Hazel 1990 Wellington 2000 Yet in discussing research studies on labwork several authors express

their concern about its effectiveness in facilitating students understanding of various aspects of scientific inquiry They point out a comprehensive re conceptualisation of the aims of labwork and as a consequence of investigating what the students actually learn in different contexts Lazarowitz Tamir 1994 Tobin Tippins 1993 Lunetta 1998 It has also been argued that the relationship between instructional activities and student learning in labwork needs more attention than it has been given in science education research Leach Paulsen 1999 It appears that the case for research based labwork emerges in several quarters in science education particularly among researchers This book presents and discusses a variety of laboratory practices and their effectiveness The studies take into account recent theoretical developments and empirical results concerning students understanding of scientific inquiry A whole chapter is devoted to technological advances offering new learning opportunities for the students and teaching facilities for the teacher *Me n Mine-Science-Term-1* Saraswati Experts, A text book on science
