The Professional Guinea Pig Big Pharma And The:

The Professional Guinea Pig Roberto Abadie, 2010-07-30 An ethnography focused on professional guinea pigs healthy paid research subjects who earn their living by participating in multiple Phase I clinical trials testing the safety of drugs in development

Adverse Events Jill A. Fisher, 2020-05-12 Explores the social inequality of clinical drug testing and its effects on scientific results Imagine that you volunteer for the clinical trial of an experimental drug The only direct benefit of participating is that you will receive up to 5 175 You must spend twenty nights literally locked in a research facility You will be told what to eat when to eat and when to sleep You will share a bedroom with several strangers Who are you and why would you choose to take part in this kind of study This book explores the hidden world of pharmaceutical testing on healthy volunteers Drawing on two years of fieldwork in clinics across the country and 268 interviews with participants and staff it illustrates how decisions to take part in such studies are often influenced by poverty and lack of employment opportunities It shows that healthy participants are typically recruited from African American and Latino communities and that they are often serial participants who obtain a significant portion of their income from these trials This book reveals not only how social inequality fundamentally shapes these drug trials but it also depicts the important validity concerns inherent in this mode of testing new pharmaceuticals These highly controlled studies bear little resemblance to real world conditions and everyone involved is incentivized to game the system ultimately making new drugs appear safer than they really are Adverse Events provides an unprecedented view of the intersection of racial inequalities with pharmaceutical testing signaling the dangers of this research enterprise to both social justice and public health

Healthy Volunteers in Commercial Clinical Drug Trials Shadreck Mwale, 2017-08-08 This book provides a richly detailed contribution to the understanding of healthy volunteer experiences in clinical drug trials in the UK Contemporary society especially the West has seen a significant increase in the production and use of pharmaceutical products particularly for disease treatment However despite the large numbers of people involved particularly in the UK very little is known about their experiences in commercial phase I clinical drug trials Shadreck Mwale critiques common conceptions of the terms volunteer and altruism as used in policy and practice of human involvement in clinical trials and calls for an awareness of the complexity of the terms and how the social contexts participants find themselves in shape acts of voluntarism Based on extensive empirical evidence and conceptual analysis the book presents new insights into the lives of healthy volunteers challenges bioethical conceptions and generates new frameworks for policy and practice of FIHCTs It will be of particular interest to scholars and practitioners in the wider social sciences medical Sociology and medical anthropology pharmacology and bioethics

Law and the Regulation of Medicines Emily Jackson, 2012-03-01 The principal purpose of this book is to tell the story of a medicine's journey through the regulatory system in the UK from defining what counts as a medicine through clinical trials licensing pharmacovigilance marketing and funding The question of global access to medicines is addressed because of its political importance and

because it offers a particularly stark illustration of the consequences of classifying medicines as a private rather than a public good Two further specific challenges to the future of medicine s regulation are examined separately first pharmacogenetics or the genetic targeting of medicines to subgroups of patients and second the possibility of using medicines to enhance well being or performance rather than treat disease Throughout the emphasis is on the role of regulation in shaping and influencing the operation of the medicines industry an issue that is of central importance to the promotion of public health and the fair and equitable distribution of healthcare resources

Anthropologies of Cancer in Transnational Worlds

Holly F. Mathews, Nancy J. Burke, Eirini Kampriani, 2015-06-26 Cancer is a transnational condition involving the unprecedented flow of health information technologies and people across national borders Such movement raises questions about the nature of therapeutic citizenship how and where structurally vulnerable populations obtain care and the political geography of blame associated with this disease This volume brings together cutting edge anthropological research carried out across North and South America Europe Africa and Asia representing low middle and high resource countries with a diversity of national health care systems Contributors ethnographically map the varied nature of cancer experiences and articulate the multiplicity of meanings that survivorship risk charity and care entail They explore institutional frameworks shaping local responses to cancer and underlying political forces and structural variables Chapter 3 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license https://s3.us-west-2.amazonaws.com/tandfbis-rt-files/docs/Open+Access+Chapters/9781138776937_oachapter3.pdf

Researching Organizations Matthew Jones, 2014-02-17 Although there are plenty of books that discuss the principles the philosophy and the techniques of research in organisations it is much harder to find information on what doing research in organisations actually involves in practice Yet this is often one of the most challenging but also most interesting aspects of a study Drawing on examples and debates from a broad range of disciplines such as criminology education and social anthropology as well management Researching Organisations explores the issues that researchers may encounter when carrying out fieldwork in organisations From getting in to an organisation at the start of the research to getting out and maybe back again at the end the book offers systematic guidance to help researchers navigate the messy reality of fieldwork Researching Organisations is designed for graduate level researchers who may be undertaking fieldwork for the first time but also for those who wish to gain an understanding of research practice

Para-States and Medical Science Paul Wenzel Geissler, 2015-04-07 In *Para States and Medical Science* P Wenzel Geissler and the contributors examine how medicine and public health in Africa have been transformed as a result of economic and political liberalization and globalization intertwined with epidemiological and technological changes The resulting fragmented medical science landscape is shaped and sustained by transnational flows of expertise and resources NGOs universities pharmaceutical companies and other nonstate actors now play a significant role in medical research and treatment But as the contributors to this volume argue

these groups have not supplanted the primacy of the nation state in Africa Although not necessarily stable or responsive national governments remain crucial in medical care both as employers of health care professionals and as sources of regulation access and albeit sometimes counterintuitively trust for their people The state has morphed into the para state not a monolithic and predictable source of sovereignty and governance but a shifting and at times ephemeral figure Tracing the emergence of the global health paradigm in Africa in the treatment of HIV malaria and leprosy this book challenges familiar notions of African statehood as weak or illegitimate by elaborating complex new frameworks of governmentality that can be simultaneously functioning and dysfunctional Contributors Uli Beisel Didier Fassin P Wenzel Geissler Rene Gerrets Ann Kelly Guillaume Lachenal John Manton Lotte Meinert Vinh Kim Nguyen Branwyn Poleykett Susan Reynolds Whyte

Human Subjects Research Regulation I. Glenn Cohen, Holly Fernandez Lynch, 2014-07-25 Experts from different disciplines offer novel ideas for improving research oversight and protection of human subjects The current framework for the regulation of human subjects research emerged largely in reaction to the horrors of Nazi human experimentation revealed at the Nuremburg trials and the Tuskegee syphilis study conducted by U S government researchers from 1932 to 1972 This framework combining elements of paternalism with efforts to preserve individual autonomy has remained fundamentally unchanged for decades Yet as this book documents it has significant flaws including its potential to burden important research overprotect some subjects and inadequately protect others generate inconsistent results and lag behind developments in how research is conducted Invigorated by the U S government's first steps toward change in over twenty years Human Subjects Research Regulation brings together the leading thinkers in this field from ethics law medicine and public policy to discuss how to make the system better The result is a collection of novel ideas some incremental some radical for the future of research oversight and human subject protection After reviewing the history of U S research regulations the contributors consider such topics as risk based regulation research involving vulnerable populations including military personnel children and prisoners the relationships among subjects investigators sponsors and institutional review boards privacy especially regarding biospecimens and tissue banking and the possibility of fundamental paradigm shifts Contributors Adam Braddock Alexander Morgan Capron Ellen Wright Clayton I Glenn Cohen Susan Cox Amy L Davis Hilary Eckert Barbara J Evans Nir Eyal Heidi Li Feldman Benjamin Fombonne Elisa A Hurley Ana S Iltis Gail H Javitt Greg Koski Nicole Lockhart Holly Fernandez Lynch Michael McDonald Michelle N Meyer Osagie K Obasogie Efthimios Parasidis Govind Persad Rosamond Rhodes Suzanne M Rivera Zachary M Schrag Seema K Shah Jeffrey Skopek Laura Stark Patrick Taylor Anne Townsend Carol Weil Brett A Williams Leslie E Wolf

Medical Law Jo Samanta, Ash Samanta, 2015-05-28 The second edition of a major text provides a thorough exploration of medical law and ethics written from the perspective of authors who are medical and health care practitioners as well as law lecturers This unique combination of academic knowledge and professional experience provides a unique perspective through which the subject is examined with academic rigour

underpinned by practical insights The text features an innovative series of scenarios threaded through each chapter to illustrate the practical realities behind the rules and concepts discussed The format also includes mind maps key terms end of chapter summaries self test exercises and suggestions for further reading

The Rise of Critical Animal Studies Nik Taylor, Richard Twine, 2014-04-16 As the scholarly and interdisciplinary study of human animal relations becomes crucial to the urgent questions of our time notably in relation to environmental crisis this collection explores the inner tensions within the relatively new and broad field of animal studies This provides a platform for the latest critical thinking on the condition and experience of animals The volume is structured around four sections engaging theory doing critical animal studies critical animal studies and anti capitalism contesting the human liberating the animal veganism and activism The Rise of Critical Animal Studies demonstrates the centrality of the contribution of critical animal studies to vitally important contemporary debates and considers future directions for the field This edited collection will be useful for students and scholars of sociology gender studies psychology geography and social work

Learning to Save the World Betsey Behr Brada, 2023-02-15 Learning to Save the World provides an innovative analysis of how individuals inhabit refuse and reconfigure the contours of global health In 2001 Botswana's government faced with one of the highest HIV prevalence rates in the world committed itself to sub Saharan Africa's first free public HIV treatment program US based private foundations and medical schools offered support to demonstrate the feasibility of public HIV treatment in Africa Given US interest and investment in global health this support created opportunities for US physicians and medical trainees to interact with local practitioners treat patients and shape health policy in Botswana Although global health has emerged as a powerful call to planetary moral action the nature of this exhortation remains unclear Is global health a new movement for social justice or is it neocolonial creating new dependencies under the banner of humanitarianism Betsey Behr Brada shows that global health is a frontier an imaginative framework that organizes the space time and ethics of encounter Learning to Save the World reveals how individuals and collectivities engaged in global health visiting experts as well as local clinicians and patients come to regard themselves and others in terms of this framework

Fertility Holidays Amy Speier, 2016-08-09 A critical analysis of white working class North Americans motivations and experiences when traveling to Central Europe for donor egg IVF Each year more and more Americans travel out of the country seeking low cost medical treatments abroad including fertility treatments such as in vitro fertilization IVF As the lower middle classes of the United States have been priced out of an expensive privatized baby business the Czech Republic has emerged as a central hub of fertility tourism offering a plentitude of blonde haired blue eyed egg donors at a fraction of the price Fertility Holidays presents a critical analysis of white working class North Americans motivations and experiences when traveling to Central Europe for donor egg IVF Within this diaspora patients become consumers urged on by the representation of a white Europe and an empathetic health care system which seems nonexistent at home As the volume traces these American fertility journeys halfway around the

world it uncovers layers of contradiction embedded in global reproductive medicine Speier reveals the extent to which reproductive travel heightens the hope ingrained in reproductive technologies especially when the procedures are framed as holidays The pitch of combining a vacation with their treatment promises couples a stress free IVF cycle yet in truth they may become tangled in fraught situations as they endure an emotionally wrought cycle of IVF in a strange place Offering an intimate first hand account of North Americans journeys to the Czech Republic for IVF Fertility Holidays exposes reproductive travel as a form of consumption which is motivated by complex layers of desire for white babies a European vacation better health care and technological success **The Experiment Must Continue** Melissa Graboyes, 2015-11-09

The Experiment Must Continue is a beautifully articulated ethnographic history of medical experimentation in East Africa from 1940 through 2014 In it Melissa Graboyes combines her training in public health and in history to treat her subject with the dual sensitivities of a medical ethicist and a fine historian She breathes life into the fascinating histories of research on human subjects elucidating the hopes of the interventionists and the experiences of the putative beneficiaries Historical case studies highlight failed attempts to eliminate tropical diseases while modern examples delve into ongoing malaria and HIV AIDS research Collectively these show how East Africans have perceived research differently than researchers do and that the active participation of subjects led to the creation of a hybrid ethical form By writing an ethnography of the past and a history of the present Graboyes casts medical experimentation in a new light and makes the resounding case that we must readjust our dominant ideas of consent participation and exploitation With global implications this lively book is as relevant for scholars as it is for anyone invested in the place of medicine in society Collective Biologies Emily A.

Wentzell, 2021-10-11 In Collective Biologies Emily A Wentzell uses sexual health research participation as a case study for investigating the use of individual health behaviors to aid groups facing crisis and change Wentzell analyzes couples experiences of a longitudinal study of HPV occurrence in men in Cuernavaca Mexico She observes how their experiences reflected Mexican cultural understandings of group belonging through categories like family and race For instance partners drew on collective rather than individualistic understandings of biology to hope that men s performance of modern masculinities marriage and healthcare via HPV research would aid groups ranging from church congregations to the Mexican populace Thus Wentzell challenges the common regulatory view of medical research participation as an individual pursuit Instead she demonstrates that medical research is a daily life arena that people might use for fixing embodied societal problems By identifying forms of group interconnectedness as collective biologies Wentzell investigates how people can use their own actions to enhance collective health and well being in ways that neoliberal emphasis on individuality obscures

Handbook of Neoliberalism Simon Springer, Kean Birch, Julie MacLeavy, 2016-07-07 Neoliberalism is easily one of the most powerful discourses to emerge within the social sciences in the last two decades and the number of scholars who write about this dynamic and unfolding process of socio spatial transformation is astonishing Even more surprising though is that

there has until now not been an attempt to provide a wide ranging volume that engages with the multiple registers in which neoliberalism has evolved The Routledge Handbook of Neoliberalism seeks to offer a comprehensive overview of the phenomenon of neoliberalism by examining the range of ways that it has been theorized promoted critiqued and put into practice in a variety of geographical locations and institutional frameworks With contributions from over 50 leading authors working at institutions around the world the volumes seven sections will offer a systematic overview of neoliberalism s origins political implications social tensions spaces natures and environments and aftermaths in addressing ongoing and emerging debates The volume aims to provide the first comprehensive overview of the field and to advance the established and emergent debates in a field that has grown exponentially over the past two decades coinciding with the meteoric rise of neoliberalism as a hegemonic ideology state form policy and program and governmentality It includes a substantive introductory chapter and will serve as an invaluable resource for undergraduates graduate students and professional scholars alike

Bodily Exchanges, Bioethics and Border Crossing Erik Malmqvist, Kristin Zeiler, 2015-12-14 Medical therapy research and technology enable us to make our bodies or parts of them available to others in an increasing number of ways This is the case in organ tissue egg and sperm donation as well as in surrogate motherhood and clinical research Bringing together leading scholars working on the ethical social and cultural aspects of such bodily exchanges this cutting edge book develops new ways of understanding them Bodily Exchanges Bioethics and Border Crossing both probes the established giving and selling frameworks for conceptualising bodily exchanges in medicine and seeks to develop and examine another less familiar framework that of sharing A framework of sharing can capture practices that involve giving up and giving away part of one s body such as organ and tissue donation and practices that do not such as surrogacy and research participation Sharing also recognizes the multiple relationalities that these exchanges can involve and invites inquiry into the context in which they occur In addition the book explores the multiple forms of border crossing that bodily exchanges in medicine involve from the physical boundaries of the body to relational borders as can happen in surrogacy to national borders and the range of ethical issues that these various border crossings can give rise to Engaging with anthropology sociology philosophy and feminist and postcolonial perspectives this is an original and timely contribution to contemporary bioethics in a time of increasing globalization It will be of use to students and researchers from a range of humanities and social science backgrounds as well as medical and other healthcare professionals with an interest in bioethics

Beautyscapes Ruth Holliday, Meredith Jones, David Bell, 2019-07-04 Beautyscapes explores the global phenomenon of international medical travel focusing on patient consumers seeking cosmetic surgery outside their home country and on those who enable them to access treatment abroad including surgeons and facilitators It documents the journeys of those who travel for treatment abroad as well as the nature and power relations of the IMT industry Empirically rich and theoretically sophisticated Beautyscapes draws on key themes of interest to students and researchers interested in

globalisation and mobility to explain the nature and growing popularity of cosmetic surgery tourism Richly illustrated with ethnographic material and with the voices of those directly involved in cosmetic surgery tourism Beautyscapes explores cosmetic surgery journeys from Australia and China to East Asia and from the UK to Europe and North Africa *The Economization of Life* M. Murphy, 2017-05-18 What is a life worth In the wake of eugenics new quantitative racist practices that valued life for the sake of economic futures flourished In *The Economization of Life* M Murphy provocatively describes the twentieth century rise of infrastructures of calculation and experiment aimed at governing population for the sake of national economy pinpointing the spread of a potent biopolitical logic some must not be born so that others might live more prosperously Resituating the history of postcolonial neoliberal technique in expert circuits between the United States and Bangladesh Murphy traces the methods and imaginaries through which family planning calculated lives not worth living lives not worth saving and lives not worth being born The resulting archive of thick data transmuted into financialized Invest in a Girl campaigns that reframed survival as a question of human capital The book challenges readers to reject the economy as our collective container and to refuse population as a term of reproductive justice *An Anthropology of Biomedicine* Margaret M. Lock, Vinh-Kim Nguyen, 2018-01-09 In this fully revised and updated second edition of *An Anthropology of Biomedicine* authors Lock and Nguyen introduce biomedicine from an anthropological perspective exploring the entanglement of material bodies with history environment culture and politics Drawing on historical and ethnographic work the book critiques the assumption made by the biological sciences of a universal human body that can be uniformly standardized It focuses on the ways in which the application of biomedical technologies brings about radical changes to societies at large based on socioeconomic inequalities and ethical disputes and develops and integrates the theory that the human body in health and illness is not an ontological given but a moveable malleable entity This second edition includes new chapters on microbiology and the microbiome global health and the self as a socio technical system In addition all chapters have been comprehensively revised to take account of developments from within this fast paced field in the intervening years between publications References and figures have also been updated throughout This highly regarded and award winning textbook Winner of the 2010 Prose Award for Archaeology and Anthropology retains the character and features of the previous edition Its coverage remains broad including discussion of biomedical technologies in practice anthropologies of medicine biology and human experiments infertility and assisted reproduction genomics epigenomics and uncertain futures and molecularizing racial difference ensuring it remains the essential text for students of anthropology medical anthropology as well as public and global health *CyberGenetics* Anna Harris, Susan Kelly, Sally Wyatt, 2016-04-28 Online genetic testing services are increasingly being offered to consumers who are becoming exposed to and knowledgeable about new kinds of genetic technologies as the launch of a 23andme genetic testing product in the UK testifies Genetic research breakthroughs cheek swabbing forensic pathologists and celebrities discovering their ancestral roots are littered

throughout the North American European and Australasian media landscapes Genetic testing is now capturing the attention and imagination of hundreds of thousands of people who can not only buy genetic tests online but can also go online to find relatives share their results with strangers sign up for personal DNA based musical scores and take part in research This book critically examines this market of direct to consumer DTC genetic testing from a social science perspective asking what happens when genetics goes online With a focus on genetic testing for disease the book is about the new social arrangements which emerge when a traditionally clinical practice genetic testing is taken into new spaces the internet It examines the intersections of new genetics and new media by drawing from three different fields internet studies the sociology of health and science and technology studies While there has been a surge of research activity concerning DTC genetic testing particularly in sociology ethics and law this is the first scholarly monograph on the topic and the first book which brings together the social study of genetics and the social study of digital technologies This book thus not only offers a new overview of this field but also offers a unique contribution by attending to the digital and by drawing upon empirical examples from our own research of DTC genetic testing websites using online methods and in depth interviews in the United Kingdom with people using healthcare services
