Imagining Italy Michael Hollington, John Jordan, Catherine Watts, 2010-08-11 This book is a companion volume to Dickens and Italy edited by Michael Hollington and Francesca Orestano which aimed to fill an important gap in our understanding of England s paramount novelist by studying his personal political and literary relation to the foreign country he loved best of all of those he visited Its focus is wider and

its scope more ambitious and speculative Without in any way leaving Dickens or his writings about Italy behind the attempt here is to approach the Victorian fascination with that country from a broader more theoretical perspective in which several current debates about travel writing are taken up and critically redeployed The book is articulated in three parts Part One concerns what the writings of Dickens and other Victorians can tell us about the history and theory of travel and travel writing and Part Two what they can tell us about particular Victorian writers themselves and their work In Part Three the focus shifts in order to compare writing and visual representations of the experience of abroad in general and Italy in particular in an era when what can be thought of as modern visual culture is gradually taking shape The book aims to show that the study of how Victorians imagined Italy can lead to a deeper understanding of some of the stereotypes that continue to inform contemporary tourism
