The Role Of Technology In Distance Education Routledge Revivals:

The Role of Technology in Distance Education (Routledge Revivals) Tony Bates, 2014-11-13 This book first published in 1984 provides a comprehensive review of the range of technology that was being used in distance education. Technological developments in word processing, video disc and viewdata, as well as computer based learning, had revolutionised the potential for distance education. These developments required the role of more conventional distance learning media such as broadcasting tuition and text to be reassessed. This book, written by international experts in the field, explored the state of the art at the time and also provided their ideas on how future developments were likely to evolve. This book is ideal for those studying education and communications. *The Role of Technology in Distance Education (Routledge Revivals)* Tony Bates, 2014-11-13 This book first published in 1984 provides a comprehensive review of the range of technology that was being used in distance education. Neuroethics in Higher Education Policy Dana Lee Baker, Brandon Leonard, 2016-11-18 This book focuses on neuroethics in higher education in the United States. After introducing readers to the philosophical and policy foundations of the neuroethics of higher education, this book explores essential conundrums in the neuroethical practice of higher education in modern democracies. Focusing on neuroethics from the perspective of universally designed learning and policy design sets this project apart from other work in the field. Advances in neuroscience and changes in attitudes towards disability have identified mechanisms by which higher education infrastructures interact with both individuals considered neurotypical and those with identified disabilities to diminish students' capacity to enter, persist, and complete higher education. Policy to date has focused on identified disabilities as a requirement for

accommodations This strategy both underestimates the effect of ill fitting infrastructures on those considered neurologically typical and serves to stratify the student body As a result neuroethical gaps abound in higher education *Routledge Revivals: Medieval Science, Technology and Medicine (2006)* Thomas Glick, Steven J.
