Victorians Pope's Mythologies A.D. Cousins, Daniel Derrin, 2023-05-05 This volume is the first to discuss the canon of Pope's verse in relation to Early British Enlightenment thinking about mythology and mythography. Pope did not merely use classical along with non-classical mythology in his verse as a traditional richly diverse medium through which to represent the diversity of private and civic life in his day but he was an ambitious translator as well as refashioner of myth. It is a medium that he shapes anew and variously across all his major poems. This volume enhances appreciation of myth as a mode of apprehension as well as expression throughout Pope's verse. In doing so it illuminates how in early eighteenth-century Britain understandings of what myth is and what it does were taking new directions not least in response to Baconian thought and its legacy.

Literature and Medicine: Volume 1 Clark Lawlor, Andrew Mangham, 2021-06-24 Offering an authoritative and timely account of the relationship between literature and medicine in the eighteenth century and Romantic period a time when most diseases had no cure this collection provides a valuable overview of how two dynamic fields influenced and shaped one another. Covering a period in which both medicine and literature underwent frequent and sometimes radical change the volume examines the complex mutual construction of these two fields via various perspectives: disability, gender, race, rank, sexuality, the global and colonial politics, ethics and the visual. Diseases fashionable and otherwise such as Defoe's representation of the plague feature strongly as authors argue for the role literary genres play in affecting people's experience of physical and mental illness and health across the volume. Along with its sister publication *Literature and Medicine in the Nineteenth Century* this volume offers a major critical overview of the study of literature and medicine.

Literature and Medicine Clark Lawlor, Andrew Mangham, 2021 Offering an authoritative account of the relationship between literature and medicine between approximately 1800 and 1900 this volume brings together leading scholars in the field to provide a valuable overview of how two dynamic fields influenced and shaped each during a period of revolutionary change. During the nineteenth century medicine was being redefined as a subject in which experimental methodologies could transform the healing art and was simultaneously branching off into new specialisms and subdivisions. Questions addressed in this volume include the influence of physics on poetry, the role of medical professionalism in fiction, the cultural and literary representation of sanitation and the interdisciplinary nature of controversy and negligence. Along with its sister publication *Literature and Medicine in the Eighteenth Century* this volume offers a major critical overview of the study of literature and medicine.

Faces of Perfect Ebony Catherine Molineux, 2012-01-02 Though blacks were not often seen on the streets of seventeenth century London they were already capturing the British imagination For two hundred years as Britain shipped over three million Africans to the New World popular images of blacks as slaves and servants proliferated in London art both highbrow and low Catherine Molineux assembles a surprising array of sources in her exploration of this emerging black presence from shop signs tea trays trading cards board games playing cards and song ballads to more familiar objects such as William Hogarth s graphic satires By idealizing black servitude and obscuring the brutalities of slavery these images of black people became symbols of empire to a general populace that had little contact with the realities of slave life in the distant Americas and Caribbean The earliest images advertised the opulence of the British Empire by depicting black slaves and servants as minor exotic characters who gazed adoringly at their masters Later images showed Britons and Africans in friendly gatherings smoking tobacco together for example By 1807 when Britain abolished the slave trade and thousands of people of African descent were living in London as free men and women depictions of black laborers in local coffee houses

taverns or kitchens took center stage Molineux's well crafted account provides rich evidence for the role that human traffic played in the popular consciousness and culture of Britain during the seventeenth and eighteenth centuries and deepens our understanding of how Britons imagined their burgeoning empire *General Catalogue* Oxford University Press,1916
