Congressional Record United States. Congress,1980 **The Rise of China** ,1967 *The Rise of China as an Economic Power* Charles Albert Eric Goodhart,Chenggang Xu,1996 *The Rise of China* William H. Overholt,1994-09-06 Since the 1980s China s economy has attained the greatest sustained growth rate in human history Overholt a political adviser and a managing director of Bankers Trust Company in Hong Kong provides an authoritative and detailed insider s look at the world s most dynamic economy Understanding China Stefan Piech,2020-09-14 China is quickly proving to be an important global player Acknowledging its inevitable growth understanding China has become as important as ever Over the last decade we have witnessed Chinese businesses expand outside the country s borders and how China s influence is spreading around the globe This might leave some wondering Is China s success due to Deng Xiaoping s opening up policy or is there something else that can be credited In this book Stefan Piech takes the reader on a journey through China s history present and future to answer this exact question While Chinese society is now infused with innovation and dynamism America has seen the foundations of its economic model shake after the 2008 financial crisis With the global rise of China the US is now facing a political challenge that it has never seen before As a consequence of this politicians and business leaders all around the world have an increased interest in understanding China At the end of the day it seems possible that China will replace the United States as the world s dominant power In doing so it will not become more western but the world will become more Chinese Consequently it is important for us to understand this rising power not through western terms but through its own unique history and culture Probably in 2035 we will pass that mantle on to China It will be the biggest economy in the world and it will go way past us and way past India Given the growth the size the opportunities I don t think there s any other place in the world that can match it David Rubenstein **The Rise of China vs. the Logic of Strategy** Edward N. Luttwak,2012-11-15 As the rest of the world worries about what a future might look like under Chinese supremacy Luttwak worries about China s own future prospects Applying the logic of strategy for which he is well known he argues that the world s second largest economy may be headed for a fall unless China s leaders check their military ambitions **China in 2020** Angang Hu,2011-05-01 The rapid pace and grand scale of China s rise have produced a heady mixture of wonder and consternation in the West Is China on track to become a superpower What would that mean for the rest of the world Economist Hu Angang approaches these questions through analysis of three major dimensions of China s rise its overall economic and social development advances in education science and technology including alternative energy and the likely complications posed by resource scarcity environmental degradation and climate change After three decades of unprecedented economic growth China is now home to the world s second largest economy It is the world s largest exporter and its second largest consumer of energy as well as number one in carbon emissions Extrapolating from these seismic changes Hu forecasts that by 2020 China will become a mature responsible and attractive superpower that will contribute

alongside the European Union to the end of the unipolar era dominated by the United States China in 2020 presents a native Chinese perspective on the challenges and opportunities that Beijing will face as its global footprint expands Through a meticulous examination of China's development trajectory Hu Angang explains how his nation as the world's largest emerging market will impact global economic growth foreign direct investment flows energy consumption and carbon dioxide emissions He proposes a comprehensive strategic framework to guide the next stage of China's rise seeking to maximize the country's positive impact on the world and minimize the negative externalities of its meteoric development **The China**
