Charles Horton Cooley, 2015-01-31 Life and the Student 1927 with a new introduction by Jonathan B Imber is a compilation of reflections commentaries and letters from other scholars that Charles Horton Cooley accumulated throughout his life The book includes personal passages on various topics within the realms of reading and writing thinking art science sociology academia religion and human nature There is no formal structure to the book except the literary sense that organizes these thoughts and observations about life It is impossible to categorize these widely ranging commentaries They include discussions of the automobile the impressionable nature of young people the claim that the question of racial superiority is still unresolved his belief that eugenicists are inconsistent in

their views and more Cooley's work sought to emphasize the connection between society and the individual. He believed that the two could only be understood in relationship to each other. While researching the effects of social responses and social participation, he created the concept of the looking glass self, which is the theory that a person's sense of self grows out of interpersonal interactions and the perceptions of others. Cooley also showed that social life and the relationship between groups and communities stems from mental phenomena.

Mapping ASEAN David Carden, 2019-09-10 For half a century ten dynamic nations in Southeast Asia have been implementing a shared vision of economic growth, sustainable development and cultural progress. Today the economies of those nations are linked inextricably with the future of greater Asia as well as with the United States and the other Western countries. With authoritarianism and protectionism on the rise around the world and the catastrophic effects of global warming making action urgent, the nations that form the Association of Southeast Asian Nations are more relevant and under greater political and social stress than ever. In these illuminating pages, David Carden, the first American resident ambassador to ASEAN, paints a vivid portrait of the regional and global cooperation required to meet today and interconnected future. Carden takes us behind the scenes as the leaders of these ten nations work to prepare their countries and their region for the 21st century. Carden persuasively argues that the unfolding story of the ASEAN nations is a story for the entire world that we are all increasingly interdependent and confronted with the existential need to solve the same set of challenges.
