

Notes

- For any crop, always research and secure a market before investing in production. This ensures a sustainable farm business operation that is market driven. Answers to the following questions are important: Who will buy? At what price? Where? Who will provide transport? Are there any hidden costs of selling? Can I add value to my product? How can I best package and sell my product?
- Get trained on production and business. The training should cover; land preparation, varieties, fertilizer requirements, management (record keeping, accounting, marketing), pests and diseases, possible problems and solutions, harvesting, storage and transportation.
- Soil quality and water available are key to successful production. Take soils for analysis and ensure you have a reliable water source.
- Visit successful and unsuccessful farms.
- Subscribe to local farmers' magazines and research more on production and business management.
- For large operations, hire an Agribusiness Consultant and an Agronomist to assist you.
