of Scottish military identity has evolved in different Commonwealth countries over the late nineteenth and twentieth centuries. In particular, it looks at the ways in which Scottish volunteer regiments in Commonwealth countries variously sought to draw upon or align themselves with or at certain key moments redefine the assertions of martial identity which Highland regiments represented.

**Phytochemistry, the Military and Health** Andrew G. Mtewa, Chukwuebuka Egbuna, 2021-03-02

Phytochemistry the Military and Health: Phytotoxins and Natural Defenses comes as a response to the gap that there has for so long existed between phytochemistry and survival of both service personnel and civilian communities during and after conflicts. Armed conflicts cause a lot of devastation to communities and should be avoided as much as it can be possible. The devastation is usually evident in service provisions such as Health, Education, Water, and Food among many others. Both service personnel and civilians are affected to various degrees. Facilities usually end up being physically destroyed with no essential supplies and/or having dysfunctional systems. Going with untreated wounds, communicable and non-communicable diseases for weeks with no medical interventions due to the conflicts, disease burdens heavily weigh down on communities as well as security personnel. To make the situation even more complicated, masses of people are forced to migrate for safety and security reasons, likely going with diseases along wherever they go. In such instances, phytochemicals become handy in providing solutions from first aid, basic analgesia, antimicrobials, and the general improvement of health. Phytochemicals are known to play a major role in the day-to-day management of diseases and health. There has been much research into their effectiveness as community medicines and as alternatives to conventional drugs. However, the role that phytochemicals play in the military counterterrorism and security has been overlooked.

**Phytochemistry the Military and Health: Phytotoxins and Natural Defenses** discusses the roles that phytochemicals play as friends and foes in the military, including insights aimed to help develop antidotes against phytochemicals and other chemical agents used maliciously as weapons. Filling a gap between drug discovery, security, and emergency medicine, this book describes which plants can be categorized for protection and controls which can be helpful in times of conflicts and soon after conflicts in military operations and those that can be used as deterrents and as emergency medicines. Carefully designed to show the contribution that phytochemicals play in safety and security, this book is useful for researchers, regulators, and anyone interested in plant chemistry. Covers the contribution that phytochemicals play in safety and security. Contains insights that will help in the development of antidotes against phytochemical and other chemical weapons. Categorizes plants in terms of their usefulness as well as the potential security risks they possess.

**Military Marxism** Adam Mayer, 2024-12-16

Adam Mayer's *Military Marxism: Africa's Contribution to Revolutionary Theory, 1957-2023* explores African Marxist theory and the intellectual merits of Afro-Maxist schools of thought to show how they have developed and impacted sub-Saharan Africa from the Cold War to the present. He also discusses the efficacy of the movements influenced by Marxism and how they are contested today. Through in-depth research, Mayer answers the following questions: Who were the African Marxist

intellectuals What happened to these intellectuals in the 1990s in NGO administered deindustrialized Africa How are these theories inspiring popular rebellions and radical anti Western military coups today This book explores how Military Marxism through its own rich and variegated African theory has continued to inform and guide the practice of various political movements today

**South Africa's High-Stress Security Environment** Gerhard Schoeman, 2024-10-11 This book presents valuable insights into the realities faced by security personnel as they deal with life threatening situations in a high stress security environment The causes and consequences of stress are explored followed by a comprehensive discussion of coping strategies and the negative consequences of not being able to cope effectively In this book a scientifically tested accessible model is also developed which provides a visual overview of the stress management process and captures the flow between stressors personality and coping strategies South Africa's High Stress Security Environment is a helpful guide for anyone who wants to gain a wider understanding and appreciation of the challenges and the courage of security personnel which we often take for granted Print edition not for sale in Sub Saharan Africa

*Fighting and Writing* Luise White, 2021-02-08 In *Fighting and Writing* Luise White brings the force of her historical insight to bear on the many war memoirs published by white soldiers who fought for Rhodesia during the 1964-1979 Zimbabwean liberation struggle In the memoirs of white soldiers fighting to defend white minority rule in Africa long after other countries were independent White finds a robust and contentious conversation about race difference and the war itself These are writings by men who were ambivalent conscripts generally aware of the futility of their fight not brutal pawns flawlessly executing the orders and parroting the rhetoric of a racist regime Moreover most of these men insisted that the most important aspects of fighting a guerrilla war tracking and hunting knowledge of the land

and of the ways of African society were learned from black playmates in idealized rural childhoods In these memoirs African guerrillas never lost their association with the wild even as white soldiers boasted of bringing Africans into the intimate spaces of regiment and regime

Reaser, Nicholas King, Gunārs Hauff Platais, Ines Arroyo-Quiroz, Meredith L. Gore, Isla Kirkey, 2025-06-03 The Smithsonian Institution has offered to cover the publication costs of most if not all of the papers accepted for this Research Topic There is a need to conceptualize an environmental justice framework that informs regulation of the international wildlife trade to minimize species endangerment and infectious disease risks while also affording environmental justice to communities nations species and

ecological systems entwined in the commerce pathway This Research Topic is dedicated to advancing the science of environmental justice in the international wildlife trade from both problems and solutions perspectives We welcome manuscripts relevant to legal and or illegal aspects of the international wildlife trade Submissions must be of a scholarly nature and framed from a social sciences perspective although inter disciplinary work is encouraged The international wildlife trade has been recognized as one of the greatest threats to biodiversity as well as a facilitator of zoonotic disease transmission with pandemic potential This has led to increased calls for regulation of this megabillion year industry ranging from comprehensive bans to risk based strategies that are species product and or geography specific Every aspect of wildlife commerce and every proposed risk mitigation measure has implications for environmental justice yet environmental justice has not been mainstreamed in the scientific inquiry policy nor planning processes relative to the international wildlife trade Because wildlife trade has diverse drivers and purposes as well as different levels of legality social legitimacy and enforcement there is an urgent need to understand the environmental justice issues tied to consumer demand vs supply provision along the trade chain including how this is influenced by economic cultural and geographic biases An understanding of environmental justice patterns and trends is necessary for the design and support of effective regulatory frameworks that manage risks in actuality rather than merely in concept Determining where and how to permit and support legal and sustainable wildlife trade versus where it should be more tightly regulated or even cease requires at least as much understanding of the human animal as it does the wildlife species A greater understanding of the political economy of the illegal aspects of the international wildlife trade from an environmental justice perspective can also open new vistas of green criminological inquiry Ecological citizenship and environmental justice are central themes in green criminology highly relevant to the wildlife trade They recognize justice as central to the right to be protected from harm whether that is one on one harm institutionalized harm or harm arising from human actions that affect climates and environments on a global scale The recognition of such rights in trade regulation is scant and more likely overshadowed by a desire to protect the economic value of a good rather than the inherent value of the wild animal being consumed We will prioritize papers that use social science approaches tools to empirically investigate aspects of environmental justice in the international wildlife trade Manuscripts should be framed so as to facilitate development of an environmental justice framework that informs regulation of the international wildlife trade to minimize species endangerment and infectious disease risks while also affording environmental justice to communities nations and ecological systems entwined in the commerce pathway We welcome manuscripts relevant to legal and or illegal aspects of the international wildlife trade Submissions must be of a scholarly nature we will not accept advocacy documents The following manuscript types will also be considered if the contributions are sufficiently innovative transformative 1 Case studies of environmental justice problems resolutions in the international wildlife trade context 2 Models for advancing the science of environmental justice in the international wildlife trade context 3

Analyses of international wildlife trade law policy frameworks with a view toward integrating environmental justice issues as rooted in scholarly science All papers should emphasize conservation goals outcomes Direct inquiries about other manuscript themes types to Dr Jamie K Reaser at Reaserjk si edu This Research Topic was developed in collaboration with the IUCN Commission on Education and Communication <https://www.iucn.org/our-union/commissions/commission-education-and-communication> and the International Alliance Against Health Risks in the Wildlife Trade <https://alliancehealthwildlife.org>

**Management Education** David N. Abdulai, 2016-04-01 In **African Centred Management Education** Professor Abdulai looks critically at the failings of management education in Africa and how that has impacted growth and development efforts especially at this critical stage in the continent's positive growth and development trajectory He concludes that Africa's current positive economic growth cannot be sustained without a significant contribution from its human capital He adds that the outstanding economic record of Asian economies in recent decades dramatically illustrates how important human capital is to growth These countries lacking natural resources and importing practically all their energy requirements have grown rapidly by relying on a well trained educated and conscientious workforce Professor Abdulai believes that Africa too can sustain its current growth and development by effectively combining its abundant natural resources with its human capital to attain its economic development but this will require an African cadre of well trained managers at the helm of both private and public sector institutions For this to become a reality management education in Africa will have to play a significant role but the author argues that it cannot be effective by continually mimicking the West in the programmes it delivers It must come up with innovative and relevant pedagogy that will address the special challenges that the continent faces and deliver an African centred management education As well as pointing to the failures of management education in Africa Abdulai

offers suggestions as to how to make management education really contribute to the education of Africans in order to sustain current and future development

**Kenya's Running Women** Michelle M Sikes, 2023-12-01 Since Pauline Konga's breakthrough performance at the 1996 summer Olympics in Atlanta the world has become accustomed to seeing Kenyan women medal at major championships sweep marathons and set world records Yet little is known about the pioneer generation of women who paved the way for Kenya's reputation as an international powerhouse in women's track and field In *Kenya's Running Women A History* historian and former professional runner Michelle M Sikes details the triumphs and many challenges these women faced from the advent of Kenya's athletics program in the colonial era through the professionalization of running in the 1980s and 1990s Sikes reveals how over time running became a vehicle for Kenyan women to expand the boundaries of acceptable female behavior *Kenya's Running Women* demonstrates the necessity of including women in histories of African sport and of incorporating sport into studies of African gender and nation building
