HOW TO POSE... HEADSHOTS & HANDS

World

LOOK DOWN

Ask your model to look down to give the shot a thoughtful mood and focus attention on the hands.
Top tip: Use strong eye makeup and shoot this from above to get a better view of the lashes.

WANDERING HANDS

Ask your model to bring their hands up to their face, with fingers on one hand resting on the palm of the other, and chin lowered down.
Top tip: Whites under each iris give eyes impact.

SIT DOWN

Ask the model to sit side-on, resting the elbows on the knees and with hands underneath the chin.
Top tip: Hands create a nicer shape if side-on rather than flat, with fingers gently curled.

ONE-HANDED

Ask your model to stand side-on, with her chin angled towards the front shoulder, then bring one hand up to delicately brush the cheek.
Top tip: Crop the shot close to the hairline.

SIMPLE BUT STRONG

A straightforward close-up is classic. Ask the model to look directly at the camera, lips slightly parted.
Top tip: Try a very shallow depth of field for this; as they're straight on, both eyes should be sharp.

WINDSWEPT

Ask the model to stand side-on, then use an electric fan to blow the hair across the face.
Top tip: Moving hair makes composing, focusing and expressions tricky, so take plenty of shots.

ENLIGHTENED

Ask your model to look up and to the side, and bring the hands up to the face, to create a reflective mood.
Top tip: Eyes right suggests a more hopeful mood, while eyes left looks more contemplative.

PERFECT SYMMETRY

Bring both hands together at the wrist with fingers on each cheek to create a symmetrical frame.
Top tip: Angle the face towards your light source for good catchlights and flattering light.

FRAME THE FACE

Bring one hand up to the chin, with the other arm resting on top of the head to frame the face.
Top tip: Think about how to pose the hair to create a natural frame for the face.

essential for family photographers looking to engage the family and bring out their subjects interpersonal relationships and individual personalities Mastering Portrait Photography Dan Bardloom, In this e book you will learn everything you need to know about portrait photography from the basics of composition and lighting to advanced techniques for capturing stunning images of people Whether you are a beginner or an experienced photographer this guide will help you elevate your portrait photography to the next level **The Best of Senior Portrait Photography** Bill Hurter, 2012-07-15 From yearbook advertisements postcard mailings and promotions to website development and digital graduation announcements every corner of the teen and senior portrait market is covered in this book of advice Featuring the artistry of top senior portrait experts this book showcases the blending of posing techniques with creative compositional and design methods in order to capture each subject s full personality Advice on posing communication and expression during sessions studio lighting outdoor lighting working with different client personalities pricing and proofing is provided **Step-by-Step Lighting for Outdoor Portrait Photography** Jeff Smith, 2014-04-15 There are many aspects to professional photography composition camera angles exposure color balance posing and lighting just to name a few However while each of these aspects of photography is important in the creation of a professional portrait lighting presents a special challenge that is part art and part science When the two come together effectively the results are stunning when any one aspect of the recipe falls short the result is a poor exposure or a downright unflattering look On the artistic side of the scale lighting is one of the primary tools for setting the mood of the portrait It can communicate a sense of bright airy ease or sharp dramatic tension or anything in between Determining what look is right for the client and for their intended use of the resulting portraits is a key decision From there the photographer can begin to use light to sculpt the subject s features minimizing problem areas or accentuating the subject s best features through the selection of light modifiers and the positioning of the lights themselves Moving to the technical side outdoor lighting present particular challenges but also some significant advantages Outdoors photographers shoot at least partially with natural light While this is most of the day an abundant light source it is largely out of the control of the photographer The light can change from moment to moment as clouds pass between the earth and sun It also changes continually throughout the day as the sun moves across the sky Since he can t completely control the light the photographer must be prepared to adapt his subject s pose and position to create flattering results with the light as is Alternately the photographer can tweak the lighting by augmenting the sunlight with flash or reflectors or even softening it using scrim or other diffusers Of course this leaves another major concern the background Even if the light on the subject can be perfected rarely can the photographer also control the light on an area as large as the background making it a major concern in the process of posing and lighting So given all this why would any photographer choose to make portraits outside One advantage is that the lighting and scenes are free making outdoor photography a great starting point for those entering the field Even established studios however have found that clients simply like the natural timeless look of outdoor portraits

This makes them strong sellers. Additionally, most portrait subjects are more at ease in natural light than when seated in front of bright, noisy studio flash units, and relaxed subjects translate into better expressions and better overall portraits. In this book, Smith takes you through the process of lighting outdoor portraits from start to finish, covering both the artistic and technical aspects of achieving success. Short one- or two-page lessons are amply illustrated to guide the reader through each phase. In many cases, before and after images or image sequences showing variations and alternative approaches are presented to facilitate learning. Readers are encouraged to have this book with them during practice sessions and work on replicating or refining the provided examples, creating a self-study course in the art of lighting for outdoor portrait photography.
