Professional's Handbook of Financial Risk Management is a major reference work in finance. A complete practical reference book covering all aspects of financial risk management including an in-depth look at operational risk management, regulation, risk-based capital and risk-adjusted performance measurement. The book focuses on practical financial risk management techniques and solutions and is designed to guide the risk professional step by step through the implementation of a firm-wide risk management framework. This book covers the various roles of the risk management function. Rather than describing every possible role in exhaustive detail, the authors have provided a story line for each of the discussed topics including practical issues that a risk manager needs to consider when tackling the subject, possible solutions to difficulties that might be encountered, background knowledge that is essential to know and more intricate practices and techniques that are being used. By providing these fundamentals, the novice risk professional can gain a thorough understanding of the topic in question, while the more experienced professional can use some of the more advanced concepts within the book. Thus, the book can be used to broaden your own knowledge of the risk world both by familiarizing yourself with areas in which you lack experience and by enhancing your knowledge in areas that you already have expertise. All authors are leaders in their field who, between them, have the expertise and knowledge both practical and theoretical to produce this definitive risk management guide. The editors of this book, Marc Lore and Lev Borodovsky, are senior financial risk managers at Sanwa Bank International, London and Credit Suisse First Boston USA, respectively. They also run The Global Association of Risk Professionals (GARP), the industry association for financial risk management practitioners and researchers. Endorsed by GARP, Global Association of Risk Professionals. Authored and edited by leading financial markets risk professionals. International in coverage, the concepts and methods covered are not specific to any country or institution but rather to the risk management profession as a whole.

Change Management for Risk Professionals James J. Leflar Jr., 2021-03-04. *Change Management for Risk Professionals* addresses a need in the marketplace for risk professionals to learn about change management. Organizations exist within a complex and changing environment. The changes within the organizational context, e.g., societal, technological, and customer preferences, place pressure upon the organization to remain relevant and competitive. Change is not inherently wrong; our perceptions of the change make it negative or positive. A perceived negative change can become a real opportunity for improvement if desired. Systemic degradation and irrelevancy are the results of an organization that fails to acknowledge the reality of change. The book focuses on the dynamics of change management with an eye toward the risk professional. There is a real need for an uncomplicated resource that helps educate non-change management professionals involved in risk-oriented change initiatives. Examples of risk disciplines are organizational resilience, business continuity, risk management, crisis management, and security management, but any discipline or function within an organization focuses on risk. Any organizational project is an initiative requiring dynamic change management skills. The author brings his extensive experience to offer risk practitioners advice, industry examples, and best practices to the change management process. Change
