National Vital Statistics Reports ,2016 **The Dynamics of Opportunity in America** Irwin Kirsch,Henry Braun,2016-01-22 Across the country our children are beginning life from very different starting points Some have aspirations and believe they can be achieved For too many others aspirations are tempered if not dashed by the sobering realities of everyday life These different starting points place children on distinctly different trajectories of growth and development ultimately leading to vastly different adult outcomes How did we get to a place where circumstances of birth have become so determinative And what must we do within communities and across our country to better equalize opportunity for more Americans both young and old The editors of this volume contend that if as a nation we do nothing then we will continue to drift apart placing an unsustainable strain on the nation s social fabric and the character of its democracy Consequently understanding the dynamics governing the distribution and transmission of opportunity and transforming this understanding into policies and programs is critical for not only the life outcomes of individual Americans and their children but also the country as a whole The goal of Educational Testing Service s Opportunity in America initiative is to explore these powerful dynamics and to describe and convey them in a way that advances the national conversation about why we must take action and how best to do so This volume contains 14 chapters including an epilogue written by leaders from a range of fields including education economics demography and political science Collectively they not only illuminate key aspects of the problem but also offer suggestions of what policies programs and changes in practices could begin to reverse the trends we are seeing Written in an engaging style this volume constitutes an essential foundation for informed discussion and strategic analysis

Policy and Inequality in Education Stephen Parker,Kalervo N. Gulson,Trevor Gale,2017-04-12 This book is an edited collection introducing the Education Policy and Social Inequality series and presents chapters from authors on the editorial board It investigates relations between educational policy and social inequality not simply in terms of policy solutions for inequalities but also how education policy frames creates and at times exacerbates social inequalities It adopts a critical stance encompassing innovative and interdisciplinary theoretical and conceptual studies drawing on e g sociology cultural studies social and cultural geography and history as well as original empirical work that examines a range of educational contexts including early years education vocational and further education informal education K 12 schooling and higher education The book argues that critique and policy studies can have a transformative function positing new dimensions for understanding the role of education policy in connection with recurrent social problems and seeking the amelioration of social inequality in ways that challenge the possibility of equity in the liberal democratic state as well as in other forms of governance and government

Republic of Uzbekistan International Monetary Fund. Statistics Dept.,2020-06-04 The contents of this report constitute technical advice provided by the staff of the IMF to the authorities of the Republic of Uzbekistan in response to their request for technical assistance The main objective of the mission was to assist the Central Bank of the Republic of Uzbekistan in improving the collection processing and dissemination of balance of payments international investment position and gross external debt statistical data including improvement of the International Transactions Reporting System as well as implementation of a medium term program for further development After the Republic of Uzbekistan authorities embarked on a course toward greater openness in the country Uzbekistan made some progress in improving the production and dissemination of statistical data but in addition to the gains that were seen the mission noted a number of deficiencies in the External sector statistics compilation system It is imperative to correct the methodology for calculating operations involving reinvested income for financial corporations and reflect the results obtained in the balance of payments

The Fiscal Cost of Conflict: Evidence from Afghanistan 2005-2016 Philip Barrett, 2018-09-11 I use a monthly panel of provincially collected central government revenues and conflict fatalities to estimate government revenues lost due to conflict in Afghanistan since 2005 I identify causal effects by instrumenting for conflict using pre sample ethno linguistic share Headline estimates are very large implying total revenue losses since 2005 of 3bn and future revenue gains from peace of about 6 percent of GDP per year Reduced collection efficiency rather than lower economic activity appears to be the key channel OLS estimates understate the causal effect by a factor of four Comparing to estimates from Powell s 2017 generalized synthetic control method suggests that this bias results from omitted variables and measurement error in equal share The findings underscore the considerable economic loss due to conflict and the importance of careful identification in measuring this loss
