Reconstruction, Identification and Implementation Methods for Spiking Neural Circuits Dorian Florescu,2017-04-24 This work is motivated by the ongoing open question of how information in the outside world is represented and processed by the brain Consequently several novel methods are developed A new mathematical formulation is proposed for the encoding and decoding of analog signals using integrate and fire neuron models Based on this formulation a novel algorithm significantly faster than the state of the art method is proposed for reconstructing the input of the neuron Two new identification methods are proposed for neural circuits

comprising a filter in series with a spiking neuron model These methods reduce the number of assumptions made by the state of the art identification framework allowing for a wider range of models of sensory processing circuits to be inferred directly from input output observations A third contribution is an algorithm that computes the spike time sequence generated by an integrate and fire neuron model in response to the output of a linear filter given the input of the filter encoded with the same neuron model

the 2016 ESSE Junior Scholar Book Award in Literatures in the English Language The Literature of Reconstruction argues for the term and concept of postmillennial reconstruction to fill the gap left by the decline of postmodernism and deconstruction as useful cultural and literary categories Wolfgang Funk shows how this notion emerges from the theoretical and philosophical development that led to the demise of postmodernism by relating it to the idea of authenticity immediate experience that eludes direct representation In addition he provides a clear formal framework with which to identify and classify the features of reconstructive literature by updating the narratological category of metafiction originally established in the 1980s Based on Werner Wolf s observation of a metareferential turn in contemporary arts and media he illustrates how the specific use of metareference results in a renegotiation of the specific patterns of literary communication and claims that this renegotiation can be profitably described with the concept of reconstruction To substantiate this claim in the second half of the book Funk discusses narrative texts that illustrate this transition from postmodern deconstruction to postmillennial reconstruction The analyses take in distinguished and prize winning writers such as Dave Eggers Julian Barnes Jennifer Egan and Jasper Fforde The broad scope of authors featuring writers from the US as well as the UK underlines the fact that the reconstructive tendencies and strategies Funk diagnoses are of universal significance for the intellectual and cultural self image of the global North **Reconstruction of Fairytale Canon in A. Müller,2020-02-28 Essay from the year 2011 in the subject English Language and Literature Studies Literature grade 2.0 Johannes Gutenberg University Mainz language English abstract In A Bayette s novels traditional fairytale discourse is the

source of many borrowings defining the plot composition system of archetypical images and stylistics of its texts The archetype as an invariant of a fairytale plot or motif is also actualised in the form of a whole series of binary oppositions constituting the archetypical core of the folklore tale sleep waking captivity liberation destruction restoration prohibition violation of prohibition The role status of characters can also be conditioned by traditional opposition for example the author of wishes is a forced executor of wishes However the main binary structure that defines the originality of the art picture of the world of fairytale novels Bayette can be conventionally presented as a confrontation between static and dynamism Staticism is understood as a predictable adherence to a certain algorithm of actions in the limited space of a classical plot and dynamism is understood as freedom to break a given scheme freedom to creatively transform a fairytale canon Turning once again to the fairytale the author just like its heroes rethinks what is known to create their own worlds and encourage the reader to create their own stories
