What Is Not God Philosophy Of Scientific Spirituality:

What Is Not God? Jacob Pannirselvam, 2014-11-04 In this book The procedural possibilities of the following philosophies are analyzed in the light of scientific principles When consciousness gives rise to energy and matter creation starts Thought is the creative power heaven or hell it is created by thought Where the Self is there happened the Big Bang Propagation in all lives including man takes place when the individual life experiences its original state of being i e body being transcended Mans life plan including hereditary and non hereditary behavior talents inefficiency and conditions of life is stuffed in his genome Man can change the gene set up in his body by meditation on the Self

A Scientific Inquiry Into the Nature of God, the Spiritual, and Near Death Experiences Stephen Blaha, 2002-06 Who is God What is His nature Is there a scientific approach to understanding God Can we apply modern scientific thinking to God in the same way that theologians apply classical reasoning to God Are there spiritual phenomena Can we rationally analyze them How do we interpret the apparently spiritual nature of Near Death Experiences Can we explain how a blind person undergoing a Near Death Experience sees the operating table with his/her mind and can describe the people there afterwards All of these questions are addressed in a clear straightforward way in this well written book A profound book that will appeal to thoughtful readers

Against the Spiritual Turn Sean Creaven, 2014-04-08 The argument presented in this book is that the recent spiritual trajectory of Roy Bhaskar's work upon which he first embarked with the publication of his From East to West undermines the fundamental achievements of his earlier work The problem with Bhaskar's new philosophical system Transcendental Dialectical Critical Realism or simply Meta Reality from the critical realist Marxist perspective endorsed here is that it marks both a departure from and a negation of the earlier concerns of Bhaskar to develop a realist philosophy of science and under labour for an emancipatory materialist socio historical science The end result is a meta philosophy which is irrealist speculative under theorized internally self contradictory and which cannot provide philosophical guidance to liberatory social practices In opposition to theist ontological logics more generally including the rather more rational theism presented by Margaret Archer Andrew Collier and Doug Porpora the argument of this book is that the earth bound materialist dialectics of the classical Marxist tradition and the naturalistic humanism these dialectics under labour on the terrain of socio historical being offer a much more promising way forward for critical realist theory and for liberatory politics and ethics

philosophers Robert Vinten brings together an international line up of scholars to consider the relevance of Ludwig Wittgenstein's ideas to the cognitive science of religion. Wittgenstein's claims ranged from the rejection of the idea that psychology is a young science in comparison to physics to challenges to scientific and intellectualist accounts of religion in the work of past anthropologists. Chapters explore whether these remarks about psychology and religion undermine the frameworks and practices of cognitive scientists of religion. Employing philosophical tools as well as drawing on case studies, contributions not only illuminate psychological experiments, anthropological observations, and neurophysiological research relevant to understanding religious phenomena; they allow cognitive scientists to either heed or clarify their position in relation to Wittgenstein's objections. By developing and responding to his criticisms, Wittgenstein and the Cognitive Science of Religion offers novel perspectives on his philosophy in relation to religion, human nature, and the mind.

Phenomenology of the Truth Proper to Religion Daniel Guerriere, 1990-05-29 The question is what constitutes truth in religion. Represented here is the whole spectrum of phenomenology: transcendental, existential, hermeneutic, ethical, and deconstructive, presented by some of the most respected names in the philosophy of religion today: Louis Dupré, Merold Westphal, and Edward Farley. Here is also engagement with a wide variety of twentieth-century thinkers such as Husserl, Scheler, and Heidegger; Ricoeur, Gadamer, and Derrida; Freud, van der Leeuw, and Eliade; and Rosenzweig, Tillich, and Schillebeeckx. This volume provides unique sources for anyone interested in the philosophical, theological, or scientific study of religion.

Christian Science Sentinel, 1899

Behind the Masks of God Robert Laynton, 2013 The big questions: Is there a God? Is there meaning and purpose to life? What happens after our physical death? Why are religions that claim to access Truth often in violent conflict with each other? If there is a God, why is there so much suffering and evil? Drawing on over forty years of personal, transcendent experiences together with studies in spirituality, psychology, and theology, the author considers the foundations of spiritual experience, belief, and practice. In the process, religious and spiritual beliefs are categorized; basic conceptions about spirituality and knowledge are considered; spiritual paths are described; the role of morality and gender in spirituality is touched upon; and the nature of existence and experience is contemplated. Does Inner Spirituality offer real answers to the big questions, or are such adepts mistaken? This second edition outlines a Spiritual Matrix. The main text has been grammatically revised throughout, and an index has been added for easy reference.
