

Intervisibility and Vertical exaggeration

1. Intervisibility

- 1.1. It is when a spot on a line of a cross-section is visible from another spot on that same line of the cross-section.
- 1.2. An examiner will ask you if you can see point A from point B in the cross-section.
- 1.3. You will only be able to answer this question if you have completed the drawing of cross-section.
- 1.4. Draw a straight line between the two points.
- 1.5. If there are no obstacles or obstructions, then the points are intervisible.

Archaeology And Geographic Information Systems Gary R Lock,G Stancic,1995-07-11 Geographic information systems GIS applications are viewed with increasing interest by the archaeology community and this book with its diversity of topics and authorship should be a useful resource Complementing the volume Interpreting Space Taylor It is apparent that there are fundamental differences between North American and European archaeological uses of GIS Primarily these differences lie in the types of evidence for past landscapes that are available for study in the two continents and secondly in the different approaches to archaeology and specifically the theory and practice of landscape archaeology This title centres on the role of archaeological theory in cultural resource management CRM and in GIS applications generally It showcases the important debate which takes the emphasis away from the technology of GIS and places it back within the central concerns of archaeology and particularly European archaeology Archaeology and GIS includes material on such concerns as CRM applications landscape archaeology intra site applications and explicitly theoretical concerns thus representing the state of GIS applications in European archaeology Contributions come from countries such as France Italy Hungary UK USA the Netherlands the Czech Republic Spain Slovenia and Finland Assessment of the Ergonomic Quality of Hand-Held Tools and Computer Input Devices H. Strasser,2007-10-05 The International Ergonomics Association IEA is currently developing standards for Ergonomic Quality in Design EQUID which primarily intends to promote ergonomics principles and the adaptation of a process approach for the development of products work systems and services It is important to assess the ergonomic quality of products hand held tools and computer input devices through working processes that represent reality Well designed working tools can be expected to reduce or eliminate fatigue discomfort accidents and health problems and they can lead to improvements in productivity and quality Furthermore absenteeism job turnover and training costs can positively be influenced by the working tools and the environment Not all these short term and long term issues of working tools can be quantified in pragmatically oriented ergonomic research approaches But multi channel electromyography which enables the measurement of the physiological costs of the muscles involved in handling tools during standardized working tests and subjective assessments of experienced subjects enable a reliable insight in the essential ergonomic criteria of working tools and products In this respect it is advantageous to provide a test procedure in which working tests can be carried out alternating both with test objects and reference models **Geography 10** RK Jain, ICSE Geography is a series based on the latest syllabus for ICSE schools They cover all aspects of the subject such as practical geography continents and water bodies their physical features climate natural vegetation resources utilization and life of the people Large sized maps make learning geography a hands on experience Exercises on the pattern of the board exams will help children to prepare for them The Oxford Handbook of the Archaeology of Indigenous Australia and New Guinea Ian J.
