factors that have helped condition not determine the course of Middle Eastern political history from ancient times to the present. These factors primarily but not exclusively geography and topography contributed heavily to establishing the patterns of state development and interstate relations in the Middle East that have remained remarkably consistent throughout the troubled history of the region. In addition to geography and topography the implications of which are explored in depth, religion has also played a major political role in conditioning the pattern of Middle Eastern history. The Greeks first introduced the politicization of religious belief into the region in the form of pan Hellenism which essentially sought to impose Greek forms of popular religion and culture on the indigenous peoples of the region as a means of solidifying Greek political control. This ultimately led to religious persecution as a state policy. Subsequently the Persian Sassanid Empire adopted Zoroastrianism as the state religion for the same purpose and with the same result. Later when Armenia adopted Christianity as the state religion followed soon after by the Roman Empire religion and the intolerance it tended to breed became fundamental ingredients in regional politics and have remained such ever since. Sicker shows that the political history of the pre Islamic Middle East provides ample evidence that the geopolitical and religious factors conditioning political decision making tended to promote military solutions to political problems making conflict resolution through war the norm with the peaceful settlement of disputes quite rare. A sweeping synthesis that will be of considerable interest to scholars, students and others concerned with Middle East history and politics as well as international relations and ancient history.

The Oxford Handbook of Egyptology Ian Shaw, Elizabeth Bloxam, 2020. The Oxford Handbook of Egyptology offers a comprehensive survey of the entire study of ancient Egypt from prehistory through to the end of the Roman period. Transcending conventional boundaries between archaeological and ancient textual analysis and bringing together 63 chapters that range widely across the various archaeological, philological and cultural sub disciplines authored by recognized experts in their respective fields, it highlights the extent to which the discipline has diversified and stresses the need for it to seek multidisciplinary methods and broader collaborations if it is to remain contemporary and relevant. Authoritative yet accessible, it is an invaluable resource for scholars, students and general readers alike.

The Ancient Near East, C. 3000-330 BC Amélie Kuhrt, 1995. A single authored two volume work which makes no claims to comprehensiveness but selectively treats periods and areas usually studied in universities. Treatment of Egypt is brief because of the availability of studies of Egyptian history at all levels. It is intended as an introduction to ancient Near Eastern history to the main sources used for reconstructing societies and political systems and to some historical problems and scholarly debates. The area discussed extends from Turkey, Anatolia and Egypt in the west through the Levant which includes Israel, Lebanon, Jordan and Syria west of the Euphrates to Mesopotamia into Iran. Volume I covers c 3000 BC to c 1200 BC, volume II 1200 BC to 330 BC. The author is a Reader in Ancient History at University College London. Annotation copyright by Book News Inc, Portland, OR.
