Environmental Discourses in Public and International Law Brad Jessup, Kim Rubenstein, 2012-02-02 How do dominant views and arguments about environmental problems traverse and connect international and public law

Reflections Dr. Mark Avery, 2023-07-04 In this informed incisive and passionate commentary on the state of nature and conservation Mark Avery reflects on our relationship with the wildlife around us From the cats that pass through his garden to the chronic decline of farmland wildlife from the Pasqueflowers he visits every spring to the proportion of national income devoted to saving nature everything is connected and everything is considered This book analyses what is wrong with certain ways we do wildlife conservation but explores some of its many successes too How can we do better to restore wildlife to everybody's lives We know how to conserve species and habitats it's time to roll out conservation measures on a much bigger scale This is a societal choice in which every nature lover can play their part Reflections sets out what is needed and what part the state environmental charities and we as individuals can play in making that happen This highly personal work from a life embedded in and dedicated to nature does not shy away from the harsh realities we face but its message ultimately is one of hope

The Ecology of Hedgerows and Field Margins John W.

Dover,2019-02-01 Hedges and field margins are important wildlife habitats and deliver a range of ecosystem services and their value is increasingly recognised by ecologists This book reviews and assesses the current state of research on hedgerows and associated field margins With the intensification of agriculture in the second half of the last century field sizes were increased by amalgamation and the rooting out of hedges synthetic pesticide and inorganic fertiliser use increased and traditional methods of hedge management were largely abandoned The book is split into two main sections The first deals with definitions current and historic management the impact of pesticides the decline in hedge stock and condition and new approaches to hedge evaluation using remote sensing techniques The second section explores the pollination and biological pest control benefits provided by hedges and field margins and examines the ecology of some of the major groups that are found in hedgerows and field margins butterflies and moths carabid beetles mammals and birds A case study on birds and invertebrates from a research farm managed as a commercial enterprise but which attempts to farm with wildlife in mind brings these themes together A final chapter introduces the neglected area of hedges in the urban environment The book will be of great interest to advanced students researchers and professionals in ecology agriculture wildlife conservation natural history landscape environmental and land management

The Common Agricultural Policy after 2013 Great Britain: Parliament: House of Commons: Environment, Food and Rural Affairs Committee,2011-04-15 The Environment Food and Rural Affairs Committee criticises the European Commission's proposed sweeping reforms of the CAP that would see the current complex and bureaucratic system of direct payments replaced by one that could be even worse These changes include a new tier of environmental conditions with penalties for farm businesses that do not comply or fail to meet new criteria for active farmers farm size and number of employees The Committee sets out the key principles the UK government should promote The first objective of the CAP should be to maintain and enhance the EU's capacity to produce food with a significant degree of self sufficiency and in the long term less reliance on income support from the tax payer The UK's future food security is threatened by the low profitability of its agriculture More than half of UK farm businesses would be unprofitable without the support they receive through the CAP The Committee concludes that direct payments have a place within the CAP for as long as business conditions in agriculture fail to deliver a thriving and profitable industry The CAP must deliver a competitive and viable agricultural sector that produces safe and high quality food with a lower environmental impact The UK should press for the EU to argue more strongly for recognition of environmental and animal welfare production standards within trade agreements The committee also warns that the EU proposal for a multi tiered single farm payment will require expensive new computer systems and auditing
