Memory of Thought Alexander García Düttmann, 2002-05-09 The Memory of Thought reconstructs the philosophy of Adorno and Heidegger in the light of the importance that these thinkers attach to two proper names Auschwitz and Germanien In Adorno's dialectical thinking Auschwitz is the name of an incommensurable historical event that seems to put a provisional end to history as a negative totality In Heidegger's thinking of Being Germanien is a name inscribed in an historical mission on which the fate of Western civilization seems to depend it thus becomes the name of a positive totality of history

Mental Health and Well-Being in Animals Franklin D. McMillan, 2008-06-02 The past few decades have seen a virtual explosion of scientific research in the area of cognition emotions suffering and mental states in animals Studies in the field laboratory and clinical medical practice have amassed an overwhelming body of evidence demonstrating that mental well being is of paramount importance in all aspects of animal care There is no longer any reasonable doubt among researchers that mental health is of equal importance as physical health and animal well being Recent research convincingly shows that physical health is strongly influenced by mental states thereby making it clear that effective health care requires attention to the emotional well being as well as physical Yet for its vast importance mental health in veterinary medicine has to date not been compiled and structured into an organized field or body of knowledge This information so critical to the formal establishment of the field of mental health and well being in animals remains scattered throughout a wide array of scientific journals This book represents the first authoritative reference text bringing together the most up to date information in the variety of subjects comprising the field of mental health and well being in animals Bringing together a host of distinguished experts internationally noted in the fields of animal emotion research animal behavior cognitive science and neuroscience the book represents the first authoritative reference compiling the diverse information on the animal mind and combining the revolutionary advances in the cognitive sciences with the knowledge in veterinary medicine and clinical animal behavior This book takes a descriptive and proscriptive approach to mental health mixing the scientific research with practical information with clinical applications for veterinary health professionals to use in practice **The Animal Inside** Geoffrey Dierckxsens, Rudmer Bijlsma, Michael Begun, Thomas Kiefer, 2016-12-07 Much has been written about animals in applied

ethics environmental ethics and animal rights This book takes a new turn offering an examination of the animal question from a more fundamental philosophical anthropological perspective The contributors in this important volume focus on how the animal has appeared and can be used in philosophical argumentation as a metaphor or reference point that helps us understand what is distinctively human and what is not A recurring theme in the essays is the existence of a zone of ambiguity between animals and humans which puts into question comfortable assumptions about the uniqueness and superiority of human nature While the chapters straddle the boundaries of historical philosophical and systematic continental and analytic approaches their thematic unity knits them together presenting a rich broad and yet cohesive perspective The first part of the book offers general explorations of the relation between animal and human nature and of the concomitant existential and ethical dimensions of this relationship The chapters in the second part address the same theme but in so doing focus on specific aspects of animal and human nature imagination politics history sense finitude and science

Animals at Work and Play Charles John Cornish, 1904 *Contemporary Literary and Cultural Theory* Jeffrey R. Di Leo, 2023-06-15 The most exhaustive mapping of contemporary literary theory to date this book offers a comprehensive overview of the current state of the field of contemporary literary theory Examining 75 key topics across 15 chapters it provides an approachable and encyclopedic introduction to the most important areas of contemporary theory today Proceeding broadly chronologically from early theory all the way through to postcritique Di Leo masterfully unpacks established topics such as psychoanalysis structuralism and Marxism as well as newer topics such as trans theory animal studies disability studies blue humanities speculative realism and many more Featuring accessible discussion of the work of foundational theorists such as Lacan Derrida and Freud as well as contemporary theorists such as Haraway Braidotti and Hayles it offers a magisterial examination of an enormously rich and varied body of work *The Animal Claim* Tobias Menely, 2015-04-10 This passionately eloquent study shows the influence of eighteenth century poetry on political theory philosophy and early discourse on animal rights Helen Deutsch University of California Los Angeles During the eighteenth century some of the most popular British poetry showed a responsiveness to animals that anticipated the later language of animal rights Such poems were widely cited in later years by legislators advocating animal welfare laws In *The Animal Claim* Tobias Menely links this poetics of sensibility with Enlightenment political philosophy the rise of the humanitarian public and the fate of sentimentality as well as longstanding theoretical questions about voice as a medium of communication In the Restoration and eighteenth century philosophers emphasized the role of sympathy in collective life and began regarding the passionate expression humans share with animals rather than the spoken or written word as the elemental medium of community Menely shows how poetry came to represent this creaturely voice and by virtue of this advocacy facilitated the development of a viable discourse of animal rights in the emerging public sphere Placing sensibility in dialogue with classical and early modern antecedents as well as contemporary animal studies *The Animal Claim* uncovers crucial connections

between eighteenth century poetry theories of communication and post absolutist rights based politics

Environmental Justice Peter S. Wenz, 1988-04-07 This book explores the philosophical background of questions on environmental justice It focuses on theories of distributive justice primarily those which concern the manner in which benefits and burdens should be allocated when there is a scarcity of benefits relative to people s wants or needs and a surfeit of burdens It is one of those rare philosophy books that is at once accessible and sophisticated as it introduces both philosophers and people interested in environmental studies law and economics to germane developments in the philosophical treatment of the question of justice Since environmental concerns are uniquely global theories of distributive justice are tested most thoroughly for their comprehensiveness when they are applied to environmental matters Consequently most illustrations and applications in this book are drawn from contexts of environmental concerns including property rights human rights animal rights general utility and hypothetical contracts

The Rise of Animals and Descent of Man, 1660-1800 John Morillo, 2017-11-22 The Rise of Animals and the Descent of Man illuminates compelling historical connections between a current fascination with animal life and the promotion of the moral status of non human animals as ethical subjects deserving our attention and respect and a deep interest in the animal as agent in eighteenth century literate culture It explores how writers including well known poets important authors who mixed art and science and largely forgotten writers of sermons and children s stories all offered innovative alternatives to conventional narratives about the meaning of animals in early modern Europe They question Descartes claim that animals are essentially soulless machines incapable of thought or feelings British writers from 1660 1800 remain informed by Cartesianism but often counter it by recognizing that feelings are as important as reason when it comes to defining animal life and its relation to human life This British line of thought deviates from Descartes by focusing on fine feeling as a register of moral life empowered by sensibility and sympathy but this very stance is complicated by cultural fears that too much kindness to animals can entail too much kinship with them fears made famous in the later reaction to Darwinian evolution The Rise of Animals uncovers ideological tensions between sympathy for animals and a need to defend the special status of humans from the rapidly developing Darwinian perspective The writers it examines engage in complex negotiations with sensibility and a wide range of philosophical and theological traditions Their work anticipates posthumanist thought and the challenges it poses to traditional humanist values within the humanities and beyond The Rise of Animals is a sophisticated intellectual history of the origins of our changing attitudes about animals that at the same time illuminates major currents of eighteenth century British literary culture

Humans, Animals, and U.S. Society in the Long Nineteenth Century: A Documentary History Dominik Ohrem, 2025-11-18 Volume II continues the discussion of animals animality in U S social and scientific thought to address the ways in which the nexus of ideas surrounding human animal distinctions became intertwined with interhuman hierarchies and power relations including through the synergistic dynamics between race and species as co implicating taxonomies of power Claire Jean Kim that informed both chattel slavery and

settler violence against Indigenous peoples A second section traces the evolution of animal advocacy from early individual voices to the formation of an organised movement following the Civil War documenting a shift however limited by structural constraints from largely anthropocentric concerns with the social consequences of human cruelty towards other creatures to a broader moral consideration for nonhuman animals in their own right
