INTRODUCTION The philosophy of space and time has been of permanent importance in

philosophy and most of the major historical figures in philosophy such as Aristotle Descartes and Kant have had a good deal to say about the nature of space and time

The Geometry and Topology of Spacetime , The Nature of Time: Geometry, Physics and Perception R. Buecheri, Metod Saniga, William Mark Stuckey, 2003-03-31 This book provides the reader with the most recent scholarly insights into the nature of time undoubtedly one of the most profound mysteries that science has ever faced The selected contributions are grouped into four conceptually different yet mutually cohesive chapters carefully woven into a comprehensive whole that goes well beyond standard treatments The subjects discussed include the fine structure of psychological time s and consciousness novel algebraic geometrical and number theoretic models of time dimension different arrows of time time travel EPR paradox quantum non locality pregeometry and a host of relevant epistemological and ontological issues The book shows that research is becoming necessarily interdisciplinary and does not ignore even such delicate issues as altered states of consciousness religion and metaphysics Although focused primarily on an academic readership the treatise can be read with profit by anyone fascinated by the enigma of time A coherent multidisciplinary sampling of the most up to date professional research on the nature of time addressing four major themes internal times and consciousness mathematical approaches to the concept of time the physicist s view of time and integrative science s views of time Essential reading for anyone scientist or layperson with a serious interest in the topic

The Conformal Structure of Space-Times Jörg Frauendiener, Helmut Friedrich, 2008-01-11 Causal relations and with them the underlying null cone or conformal structure form a basic ingredient in all general analytical studies of asymptotically flat space time The present book reviews these aspects from the analytical geometrical and numerical points of view Care has been taken to present the material in a way that will also be accessible to postgraduate students and nonspecialist reseachers from related fields
