Brams, 2024-03-12 A game theoretical analysis of interactions between a human being and an omnipotent and omniscient godlike being highlights the inherent unknowability of the latter s superiority In Divine Games Steven Brams analyzes games that a human being might play with an omnipotent and omniscient godlike being Drawing on game theory and his own theory of moves Brams combines the analysis of thorny theological questions suggested by Pascal s wager which considers the rewards and penalties associated with belief or nonbelief in God and Newcomb s problem in which a godlike being has near omniscience with the analysis of several stories from the Hebrew Bible Almost all of these stories involve conflict between God or a surrogate and a human player their representation as games raises fundamental questions about God s superiority In some games God appears vulnerable after Adam and Eve eat the forbidden fruit in defiance of His command in other games his actions seem morally dubious when He subjects Abraham and Job to extreme tests of their faith and in still other games He has a propensity to hold grudges in preventing Moses from entering the Promised Land and in undermining the kingship of Saul If the behavior of a superior being is indistinguishable from that of an ordinary human being his existence would appear undecidable or inherently unknowable Consequently Brams

argues that keeping an open mind about the existence of a superior being is an appropriate theological stance **Russian Literature and Cognitive Science** Tom Dolack,2024-11-30 Russian Literature and Cognitive Science applies the newest insights from cognitive psychology to the study of Russian literature Chapters focus on writers and cultural figures from the Golden to the Internet Age including Pushkin Dostoevsky Tolstoy Sologub Bely Akhmatova Nabokov Baranskaya and contemporary online discourse The authors draw on a wide array of cognitively informed fields within psychology and related disciplines and approaches such as social psychology visual processing conceptual blending cognitive narratology the study of autism cognitive approaches to creativity the medical humanities reader reception theory cognitive anthropology psychopathology psychoanalysis Theory of Mind visual processing embodied cognition and predictive processing This volume demonstrates how useful a tool cognitive science is for the analysis of literary texts *Tortured Cardboard* Philip E. Bosman,2019-03-04 This book formulates a new theological approach to the study of religion in gaming Video games have become one of the most important cultural artifacts of modern society both as mediators of cultural social and religious values and in terms of commercial success This has led to a significant increase in the critical analysis of this relatively new medium but theology as an academic discipline is noticeably behind the other humanities on this subject The book first covers the fundamentals of cultural theology and video games It then moves on to set out a Christian systematic theology of gaming focusing on creational theology Christology anthropology evil moral theology and thanatology Each chapter introduces case studies from video games connected to the specific theme In contrast to many studies which focus on online multiplayer games the examples considered are largely single player games with distinct narratives and end of game moments The book concludes by synthesizing these themes into a new theology of video games This study addresses a significant aspect of contemporary society that has yet to be discussed in any depth by theologians It is therefore a fantastic resource for any scholar engaging with the religious aspects of digital and popular culture *Journey Through the Video Game World* Ashad Mukadam,2014-08-20 In February 2013 Ronald Charlton was laid off from his job at Pacific IT and Consulting in Calgary Alberta Canada Soon after he decided to start playing video

games initially as a way to just let out some steam However it is now August and he has still not stopped playing He only seems to get off of the couch when he goes to eat sleep and work out This is now starting to affect the relationships he has with his parents Monica and Harold and his brother Mitch and especially with his girlfriend Dawna Langston Then on a rainy day in August 2013 a major thunderstorm hits Calgary Ronald who has been playing throughout the storm is just about to hit a new high score on his video game when lightning strikes the console causing an electrical current to travel down the wire to his controller which then surrounds him and transports him to the video game world He soon finds out from the government of the video game world commonly called The VGG that he must physically play and complete a number of games in a certain order only known to them in order to get home Ronald along with his guide Pixie then embark on a journey to return Ronald home Will he make it back to the real world or is Ronald doomed to stay in the video game world forever
