**Conundrum** John Ryan, 2014 This book examines four scenarios regarding the global currency regime of the future and China's influence therein It focuses on the US Dollar decline as the global reserve currency on the Euro as number two reserve currency on the potential of the Renminbi to become a reserve currency and on the IMF's Special Drawing Rights SDRs Navigating the Field Mildred Oiza Ajebon, Yim Ming Connie Kwong, Diego Astorga de Ita, 2021-05-31 This volume is a collation of postgraduate fieldwork experiences in social research that provides a platform for early career researchers ECRs to be open about the hidden labour of doing postgraduate fieldwork This book documents diverse fieldwork experiences gathering critical reflections on the field from a wide range of ECRs The issues presented here go from the process of identifying the field to navigating life in and after it including things that happen in between This text shows a different set of methodological considerations in relation to access ethics identity positionality power and practices highlighting how ECRs fieldwork experiences may help broaden traditional frameworks of research Exploring how postgraduate researchers make sense of these issues and what kind of decisions they make in specific circumstances helps to reveal broader concerns institutional practices and constraints Through these reflections this book makes an important point

that there is a need for researchers to document the real story behind fieldwork The honesty and openness of contributors in this volume are positive steps towards fostering a research culture where reflections upon weaknesses and failures are as welcome as presentations of successful fieldwork techniques and methods The fact that this book is written and edited by ECRs the topics it presents both emerging and long debated but still relevant and the broad range of approaches make this text unique We hope these points will make this work useful for researchers of all levels and across disciplines and that this text will allow the reader to rethink some essential aspects of social research that are often taken for granted We expect the diverse reflections offered in this book to appeal to researchers across disciplines at different stages of their career and that this will be a useful resource for researchers to map and navigate their own research pathways

China and EU Jing Men,Annika Linck,2017-05-12 Reform and governance are of vital interest to both the People s Republic of China and the European Union EU China is facing demographic and environmental challenges and has been

experiencing a rapid economic transition. The social tensions arising from these challenges call for a governance system that will allow the Chinese leadership to alleviate social tensions without putting at risk their leadership. A society which is becoming more diverse and facing problems of a global scale that also cause turmoil at the grass roots may be difficult to govern top down. Notwithstanding the Communist Party of China's CPC grip on Chinese society, there may be ways to integrate public opinion and civil society organisations in governmental decision making through reforms that do not challenge the current leadership. The EU on the other hand faces the same global challenges with a very different and complex governance system. EU foreign and security policy, thus including EU policy towards China, are governed by the EU's foreign policy principles which contain among others the promotion of democracy, the rule of law and the universality and indivisibility of human rights and fundamental freedoms. How successful can the EU be in advancing these principles when engaging with China while respecting the Chinese political system? How can the EU and China find common grounds in their governance systems so as to enhance their strategic partnership in order to tackle global issues that need a coordinated approach?

**The Bridge to a Global Middle Class** Walter Russell Mead, Sherle R. Schwenninger, 2003. The Bridge to a Global Middle Class compiles a unique series of papers originally commissioned by the Council on Foreign Relations in the wake of the financial crises of 1997-1998. This thought provoking retrospective culls the views of economists, international financial institutions, Wall Street, organized labor and varying public interest organizations on the issue of how to fortify our global financial infrastructure. Their effort is the culmination of an 18-month study, The Project on Development, Trade and International Finance, that seeks to encourage the evolution of middle class oriented economic development in emerging market countries. In addressing the world economic problems that led to the crises and examining methods to improve the workings of the world's financial markets, they offer ideas, policy recommendations and suggest the concrete forms these might take in the drive to transition the world economy toward strategies that offer the developing world an improved standard of living. These papers make a convincing case for middle class oriented economic development as the key to global prosperity and stability. U.S. and international policy makers will find these insightful discussions valuable in forming new policy and providing the appropriate stimulus for economic development in emerging economies.

**Strategic Conundrums** Rajiv Sikri, 2024-07-30. The book examines India's current and looming foreign policy challenges from a strategic and policy oriented perspective. It analyzes the long term factors and trends that should determine the country's foreign policy formulation. The author urges a reappraisal of India's approach if it is to become a major player in the complex and rapidly evolving 21st century world. Strategic Conundrums: Rethinking India's Foreign Policy focuses on India's immediate and strategic neighbourhood. It also looks at important issues like energy security, economic diplomacy, the interaction between defence and diplomacy and foreign policy institutions. A unique feature of the book is that it combines the perspectives of a historian, a diplomat and a scholar. With many new out of the box ideas and policy suggestions, it makes a valuable

contribution to the ongoing debate on foreign policy within India's strategic community. This lucid and succinct book is a must read for policy makers, diplomats, and foreign policy analysts. The corporate and business community too will find it professionally relevant. It is also an important knowledge resource for students of Indian politics, international relations, and defence and strategic studies, and others who are interested in India's foreign policy.

**Global Investor Spots** Aiden Feynman, AI, 2025-01-08. *Global Investor Spots* offers a comprehensive analysis of international investment opportunities, combining market dynamics, government policies, and quality of life factors to identify optimal locations for business expansion. Through extensive research spanning 2010-2023, including interviews with 200 international entrepreneurs and data from 30 countries, the book presents a systematic approach to evaluating global markets for investment potential. The book's unique value lies in its three-pillar framework: examining the interplay between emerging versus established markets, government support systems, and talent attraction factors. Notable insights include detailed case studies of success stories in regions like Southeast Asia and Eastern Europe, and analysis of business-friendly policies in countries such as Estonia, Singapore, and Rwanda. The proprietary Business Climate Index, which evaluates 50 different variables, provides readers with a practical tool for assessing market potential. Progressing from market assessment methodologies through government incentive programs to quality of life considerations, the book maintains a balance between academic rigor and practical application. Each section includes actionable frameworks and decision-making tools, making it particularly valuable for international investors, entrepreneurs, and policy makers. The focus on lesser-known markets alongside established business hubs reveals overlooked opportunities while acknowledging the dynamic nature of global markets and providing readers with tools for ongoing analysis rather than static information.

[Simulations of Decision-Making as Active Learning Tools](#) Peter Bursens, Vincent Donche, David Gijbels, Pieter Spooren, 2018-03-05. This volume brings together both political and educational scientists. While educational research literature has so far not systematically addressed the tool of simulations of decision-making, political scientists have hardly used insights from research on assessment or on motivation and interest of students. Almost all political science publications on simulations merely discuss how to implement the tool in class and fall short of providing evidence of the effects on student outcomes such as increased interest and performance. Combining the two disciplines is mutually enriching. Political science benefits from state-of-the-art educational science measuring and testing of the claims made by the proponents of simulations, while educational sciences adds the systematic analysis of simulations of decision-making to their list of empirical objects, which also adds insights to the theories on the affective component of student learning. It is the explicit aim of the volume to address how simulating decision-making environments fosters learning. Implications for research and practice regarding student learning are addressed in all chapters.
